MAEG – BI - WKLY GROWTH_EQUITY ANALYSIS SG 2011 # NOV_20

For Immediate Release – Sunday AM (EST)

By: Suneil R Pavse

Contact: apavse@aol.com

- Daily SPX - “ Trend Adjusted Signal” TAS -MO

- Momentum Break Indicator MO – Trend Adjusted Signal (TAS)

In 2011 - (7) – TAS – Signals for Risk Management were Triggered as Hedge with SPX

Refer our last Report – TAS – ALERT – in 16th Oct E# 2 -Report , we stated parameter for SPX Hedge Trigger as 1210 Sell . On 17th Oct it Triggered @ 1203

**(NEW) TAS – SPX “ Buy “ To be Triggered close above 1235 buy .
currently the Portfolio is Hedged on longs since 1203**

**(Note- This signal is Risk protection, Independent of POM but if announced by Alert, it can be overridden by POM).
Caution - Trend Adjusted Hedge due to whip saw takes bite out of it whiles managing MO risks**

○ **Key points of observation – Real time**

○ Our Prop Growth Strategy (Long only without hedges) has been Holding very well this year on each market decline v/s SPX & comparative to GS or MER – Growth Index.

○ YTD MAEG Growth +0.5%

○ YTD SPX (- 3.3 %)

○ Conclusion – Overall YTD P/L – Top 50 Growth Portfolio (with Risk Managed SPX Hedges with TAS & POM's)..... **up + 25.8 % v/s (- 3.3 %) SPX dn. Real time.**

Top 50 Growth Portfolio (Risk Managed) – (1st Jan 2011 – Current) – Real Time

- 1st of Jan 2011 – YTD – MAEG Risk Adjusted Portfolio **is up + 25.8 % v/s (- 3.3) % SPX on Real time basis**

Key point – These EQUITIES are Sold and are good candidate to review for RA / RI over valuation for SHORT SELL

- **APPENDIX - Key points (Notes from past)**

- *Our own Growth Strategy completely fits in to the Criteria of - **Dr Chris Kacher Analysis Fundamentally and Technically** .*
- *With reference to **GMO paper**, this Growth stock Model also very much fits in majority of those criteria , once we overlay F- Score, P/PB strategy and other RA / RI Matrix (HQ) ,It should give us Buy list to project Equally weighted MAEG growth Index for Monitoring purposes with Bi -Monthly rebalancing*
- *For Risk Management via “ Trend Adjusted Signal on SPX” Triggers Sell Signal , the portfolio will be Hedge 100% via Short SPX. Currently SPX is on Buy side, We experience Tow such Sells in past 4 months*
- *Out of the 50 Top Growth stock list, the Sold stocks are complies with Overvaluation, SD # 2 (Sectors), post POM 14 and Technically break on Momentum stock process. This list would fit well with our SETUP # 4 (after it is sort the out for RA / RI Framework in LQ) (*We have began this process*)*
- *Conversely , All high Quality Stocks from this Growth list to be viewed within RA/RI Framework for POM*
- *12, 11 for PQV Analysis at that time (*We will initiate this process Prior to POM 12, 11*)*

- **Objective**

The Focus is to add another dimension to our “Stock selection process” via Bi- Weekly scan of Bottoms up “Growth Stock universe ” and validate Top down to “ Separate potential Long / Short” List Utilizing, POM’s, Sector SD’s, PQV & SETUP INDEX within RA / RI framework as described in process steps below

- **Our Objective on BUY SIDE of this Portfolio** – to be Refined / Filtered further within RA / RA framework for POM 13 entry (**Process still pending**) . Also note worthy is, currently some of these growth stocks has premature texture of SETUP # 4 that continues to drive P/L on this Portfolio as LONG POSITIONS
- **Our Objective on SELL SIDE of this Portfolio** - Among the SOLD / EXITED stocks (**also classified as Declining MO**) , are now qualified for our MAEG Setup # 4 evaluation (We have some in our PQV Validation process, awaiting Trigger). (**Process initiated**)

Step 1 – SELECTION OF GROWTH STOCKS – Buy Side Discipline,
Attached, “ Growth Stock list of 50 Stocks” selected with that has distinct characteristics.

- EPS YoY / QoQ**
- Sales Growth YoY / QoQ**
- Positive Earnings Surprises**
- High Relative Performance vs. Market**
- ROE increase YoY**
- Margin Expansion YoY**
- Increase in Ownership YoY**
- Increase in Sponsorship YoY**
- Attractive Free Cash Flow**
- Breakout from Consolidation with Momentum (E.G. Momentum SMA, Pivot point break outs)**

Step 2 – SEPARATION OF GROWTH STOCKS VIA SPX - POM STATUS

- **At POM 14 and above Scan for SHORT list via (OVEREXTENDED & OVERVALUED)**

- Over Valuation of Stock within MAEG -RA/RI framework
- Over Valuation of Sector via Standard deviation (SD's)
- Setup Index Analysis (# 2, #4)
- PQV Validation Analysis
- 3X3 / 9EMA breakpoint – Trend adjusted Signal Analysis (If applicable)

- **At POM 12 and 11 Scan for LONG list via (HIGH QUALITY BUSINESS & UNDERVALUE)**

- Under Valuation of Stock within MAEG -RA/RI framework
- Under Valuation of Sector via Standard deviation (SD's)
- Setup Index Analysis (# 1, # 3)
- PQV Validation Analysis
- 3X3 / 9EMA breakpoint - Trend adjusted Signal Analysis (If applicable)
- Additional key ingredients of Dr Chris Kacher Analysis (if applicable)

Key points

1. Integration of - Dr Chris Kacher Analysis. Since it is Bull market focused, therefore more values can be at POM 12 however part of its Analysis is also utilized within our own PQV process under its own different terminologies inferring the same conclusions
2. At POM 15 Dr Chris Kacher Analysis can add value to our process by taking contra view on the process.
3. 3X3 / 9EMA Breakpoint – Trend Adjusted Signal is more improvised then 10-DMA, which doesn't take into account the break of lows Program trades and Single dimensional 10 DMA tends to whip saw at higher degree.

Step 3 – OUTCOME OF THIS ANALYSIS WILL BE ACTIONABLE IDEAS OF INTEGRATED PROCESS

• Growth Insights

- *We are working on Rational filtering process on “Buy Side” Objective on these MO stocks.*
- *Simultaneously has been filtering SETUP # 4 ‘s on “Sell Side” for Short Sell. (see list below)*
- *This Work in Progress for Research Team*

Daily SPX - “ Trend Adjusted Signal”

• 3x3 /9EMA – Break Indicator –

The process utilizes the cumulative Algorithm of price trails 3x3 / 9EMA input signals for Trend formation. This signal tends to work well in Market extensions (i.e. Post POM 14).

This Methodology is implemented by Program Traders especially in Momentum extensions and diagonal triangle formation Trend-following system which bases its reversal signals on breaking a significant closing Break Indicator I to confirm the new trend. (it's important to use a stop if you act on a signal). The reversal price is generated on the close of a bar. (The drawback of strategy is that it can whip saw).

INTERNALS OF 3X3- 9EMA – Break Indicator.

The line break indicator has captured the post POM 14 Moves on a mechanical basis. Although can't guarantee it will continue. But, even if it misses on occasion , it's still is the best indicator we've ever seen in Market for extensions.

Tight trading ranges tend to cause whipsaws and those are environments where trading multiple markets can help for diversification, in SPX & DOW. The reason is that we have a purely mechanical indicator, our line break indicator, that is much better to use. That indicator has proven extremely good over the past several months in many markets in many extensions.

As a reminder of how simple this indicator is, when the market closes above the "break" price level, the indicator is ""bullish"; when the market closes below the break price, the indicator is then "bearish". at the close
