Research Note – Weekly Market Strategy SPX - (A # 1) – STRATEGY & PROP ANALYSIS –(SP)

MAEG- MS – SPX – POM-SG 2011 # DEC_05

For Immediate Release – Monday AM (EST)

By: Suneil R Pavse

Contact: apavse@aol.com

Market Strategy SPX (A # 1) – (SP) - SPX – Closed @ 1244 (Past Weekly change +7.4%)

Analysis of Broad Market that includes – Jan 1st 2011 – SPX 1257 (YTD change -0.8%)

- Primary Market SPX (or SPY) as main market driver and
- Secondary Markets NYSE, DOW (DIA) .

Selected charts (below) that has some distinct characteristics from last weeks observation based on our assessment:

- **Contents for coverage within A # 1 MS**

- Daily Trend Adjusted Strategy - 3x3 / 9EMA – DOW, SPX (if change of Signal)
- Primary Market Analysis – SPX, MID, ST , LT
- Time / Cycle Analysis- Bradley Cycle, 4 yr Cycle, Astro- Harmonic Cycle, Seasonality Cycle, Oil / CU / TNX Cycles
- Advance / Decline Internal market behavior – A/D – SPX, % BULLISH, NH/NL, VOLUME, in 2nd & 3rd Derivatives
- Sentiment Analysis with Extreme character – TICK , TRIN, ARMS, PUT / CALL in 2nd & 3rd Derivatives, VIX , M. Flow,
- Secondary Market Analysis for SPX clues – NASD, RUSS, ((if required)
- Sector Analysis for SPX clues – BKX, SMH (if required)
- Sector Analysis for SPX clues – CHINA, FTSE (if required)
- Appendix - Objective, POM Signals Summary , History Trading conclusion , POM /C Guidelines & Criteria.

Index

1. EXECUTIVE SUMMARY.

2. SPX – POM Signals, Price Projections & Conclusions.

3. SPX – Market Commentary

4. SPX – Chart Analysis - SHORT TERM

5. SPX – Chart Analysis – MID TERM

6. SPX – Charts Analysis – LONG TERM

7. APPENDIX – Objectives, POM Signal History, POM /CZ Guidelines & Limitation , Disclaimers

● 1. EXECUTIVE SUMMARY

- *On Friday 12/02 **ALERT**, Market Triggered POM 14 Re – Run at 1251 ending its POM 13 signal (1188-1178) of 11/22 which proved its merit. This has resulted in Risk Management savings of 70 points on re balancing Hedges taken at POM 14 during this counter trend bounce.*
- *POM 14 has History of testing and re testing which is part and parcel of Topping Process . There could be another run upward possible to slightly higher prices 1270 (although it doesn't have to) before “mark down “ phase begins.*
- *Various Broader Indices within A # 2 will test its own personal CZ during this process. It is a patience game. This gyrated swings allows to “” scale in position . POM 14 – CZ still remains Top heavy area. POM 14 is more like Picking within the Price Zone*
- *Our First downside Price Target is CZ 1195-1210 (previous POM 13 area) on this ABC down.*
- *Overall, SPX began its Price Oscillation @ POM 14 (Fully Hedged of Core position) still have the price target to be around 1125. which should complete the final Oscillation. (certainly not in straight line) . A Stop above 1295 for any fresh positions that were not part of the previous ..POM 14 -13 profit lockin Cycle. Just in case if SPX gets extended then we shall reevaluate and Trigger back in.*
- *For more Justification for the Market Calls and its Price Path, Refer Detail Charts in the Trailing sections within the Report*

- 2. SPX – POM Signals & Price Projections
- SPX -Trading & Investment Real Time Conclusions
- Start point 1257 (1ST Jan) – YTD 1244 = (-0.8%)

Current Signal – POM 14- Re – 1251 (CZ 1250-1270).

- POM 15 - Net Short -- **None Triggered in 2011 - (Total points gains = 0)**
- POM 14 / Re - Fully Hedged -- **(Total points gain = -88+ 85+ 97 = + 94**

Alert (Open Oscillation) - SPX - POM 14 re – Triggered (12/02) at 1251 (Fully Hedge Position) & Alert note A# 3 – MS - QQQ Trigger was at 59 Monday (10/31)

- POM 13 - Risk Management Hedges - (Total decline saved) = 71+140+70 = + 281
(Proportion of Rebalancing Beta & Net Exposures to be based on individual Portfolio Objectives)
- *Risk Management Signal -SPX - POM 13 – Triggered (11/22) at 1188 . The following AM 11/23, the Market opened with Gap Down to 1178. Position Rebalanced at 1251 on 12/02 POM 14 re Run = 70 points*
- POM 12, POM 11 - Net Long – - (Total points gains = 75-20+79+123 = + 257
- Breakdown of POM Summary points & Signals are sated in Appendix.
- *Like any other Model, it is not perfect but Risk Management is the First objective (Generate Alpha @ 1/2 Market Risk from POM to POM – CZ 's).*
- **Focus** - POM's are better actionable areas for us to produce Highest Reward for the Risk" then entering positions in between the moves of POM

• 3. SPX – Market Commentary (Corrections in red)

Market upon POM 14 Trigger at 1251 on Friday, this AM it is Gaping up to 1265 . This is giving us the opportunity to “Scale in” to Re balance positions / Capital back in that was Risk managed at the time of POM 13 prior to the counter Trend move .

We prefer that today’s Gap up **should** hold (at least ½ way open by the closing time) to complete the Pattern on “ 3 gap play” . If not it runs the risk of another Gap up by mid this week.

On Friday 3rd Gap of “3 gap play” was negated at close. The downside Target of the 3 gap play is where the 1st Gap initiated from in the direction of the move that is 1180 Target (See chart and Analysis below)

Past week, market bounced 7% . POM 13 and its Indicators(as noted within the last week’s in A # 1 – MS) proved its merit during this counter Trend bounce for Risk Management / Re balancing .

In this **latest** rally there was no Buying power evident , Money flow shows no sign that new money **has** re-entered the market. The liquidity pumping needs to levitate the Market back away from this congestion zone. We have charts below on SPX v/s QE of past for comparison.

ADDED NOTE based on charts below

If QE-3 initiates the Price move extension with false breakout then the termination process on Price Path should end up with POM 15 for NET SHORT.

The price path can have (1) “Gradient Mode with Triangular Top Pattern “ similar to QE-1 (which we had nailed in our “ Institutional Report” on 10th April 2010 prior to CRASH of 1000 points or (2) “ 3 Drives to the Top Pattern” similar to QE-2, This too came Crashing down with “ Rolling Top” which we preferred to play with POM 14 (fully Hedge) but did not Trigger POM 15 (for NET SHORT).

Although we announced and played (Two) Bullish CZ to Bearish CZ moves within this Pattern via 1-2-3-4-5 (3X3X3/9EMA) algorithm for Risk Management and some extra alpha.

More information about this Analysis and potential impact of QE-3 & its ceiling areas is in Charts below. The Trigger for POM 15 (NET SHORT) may come after the extension (if and when it does) .

Cont...

Back to current conditions, this week, the Time termination & Astros Cycle turn is around 10th Dec . We could very well put in high **as** we get closer to 10th and then Pull back . After the Pull back we think another rally towards the current area “ call it year-end rally and anxiety with “ Santa” to take the sidelines cash. **This is the rally one would want to watch to fail on impact of QE -3. The initiation point of this will be closely monitored around 1195 -1205**

Best Seasonality days in November – December – These historically produces 50% of the entire Seasonality gains

- **POM's impact within the Positive seasonality turns**

- **31st Oct – 4th Nov – Failed seasonality.** (On 31st Oct we were at POM 14 in contradiction with Season . POM 14 projected this failure was coming and it did).

- **22st Nov – 2nd Dec – Gained Seasonality, SPX Began @ SPX 1191 to 1244 = +4.4%** , (On 22nd Nov we were at POM 13, this call coincidently was in line . It projected the bounce was coming and it did).

- **Next to come –**
- **21st Dec to 23rd** ,
- **28th Dec – 30TH Dec**

(We will monitor these as they come)

Bradley Model was Correct for November , SPX was up 1.1%) . December is expected to be down we shall see (See the charts below within Cycle Work.)

SPX – 2010 - QE -1 & QE 2 v/s POM 14 - Analysis

SPX – 2012 - QE – 3 v/s POM 14 - Analysis

SPX - SHORT TERM – Analysis

- SPX – Hrly Poly Trend & Wave Analysis
- SPX - Wave Projection Analysis
- SPX - DMA & Trend Analysis
- IWM - Poly Trend Analysis (**January Correlation Lead Indicator**)

SPX - MID TERM – Analysis

- SPX – PEC –D
- VIX – SPX Ratio
- A/D Line - Oscillator NH / NL
- A/D Line – 200D – Bullish Bearish Ratio Breath
- A/D Line – 200D – Bullish Bearish Ratio Breath
- SPX –Calendar Cycle
- SPX – Bradley Cycle
- SPX v/s OIL - **CORRELATION RATIO Analysis with other Markets**
- SPX Liquidity – **EXTREME SENTIMENT indicator (3RD Party)**

SPX - LONG TERM – Analysis

- SPX – EMA Cross with PPO

SPX – 2010 - QE -1 & QE 2 v/s POM 14 - Analysis

On 13th December FOMC meeting we should learn more about QE-3 to initiate in 2012. The conclusions of past two QE's are defined below.

Power of QE-1 in 2010 took the Market to POM 15 (Net Short) and Market put in "Triangular Top", then power of POM 15 Crashed the Market 1000 Point in 1 day. That was POM's best call of 2010

Power of QE -2- in 2010 did not take the market to POM 15 but remained on POM 14 for 4 Months with pattern " 3 Drives to the Top" and then came in nasty decline towards the end of February to wipe all gains (Note POM 14 is Fully Hedge call and NOT " Net Short by our O & M manual.

SPX – 2012 - QE – 3 v/s POM 14 - Analysis

If on 13th December if we Trigger QE-3 , under current POM 14 Regime (See chart below) . Our conclusions is defined below.

First , - we do not believe we will get a Triangular top on this move . Mathematics regarding the Gradient and Kinetic energy is not set up for those conditions unlike situation in QE -1 .

Second – We do believe Pattern could be similar to QE-2 “ 3 Drive to the Top” & rolling top but we think it will NOT last for 4 Months as in case of QE-2 . It should have life of max 2 months in Time.

In Terms of Price Termination Cap . The Current Cap is much lower then what we witnessed in QE-2. Market internals are much poor now then during time of QE-2.

SPX – 2012 - QE – 3 v/s POM 14 – Analysis

SPX Weekly charts at QE -2 breakout (Price wise both breakout areas had wide price differential. The Current Price Band width is much narrow and the internals are much poorer this time . Any false breakout will end up very Ugly. QE-1 Crash of 1000 points and QE2 – 3 Drive to the Top might look very mild in comparison . If such extension occurs and translates to POM 15 we will put Net Short Position on this Run (POM 14 is for Fully Hedged by our books)

SHORT TERM - Analysis

SPX – Hrly - Poly trend Analysis

- Today's Gap up takes us back into the POM 14 CZ 1251-1270 , we think on completion of this price move , We should have a leg down . (We monitor closely)
- Notes within the chart highlights the A/D Oscillator needs to flatten to keep the volatility down to get new leg down started. .

SPX – “ 3 Gap Play on Upside ” Projection Analysis

On Friday – 3rd Gap was negated at the close . This AM it re ignited the Gap at Open . 3 Gap play began at 1180 to 1260. The Downside target of this Projection is where the pattern began 1180 (The key is we need 30% climax in between the trend) . as circled in red.

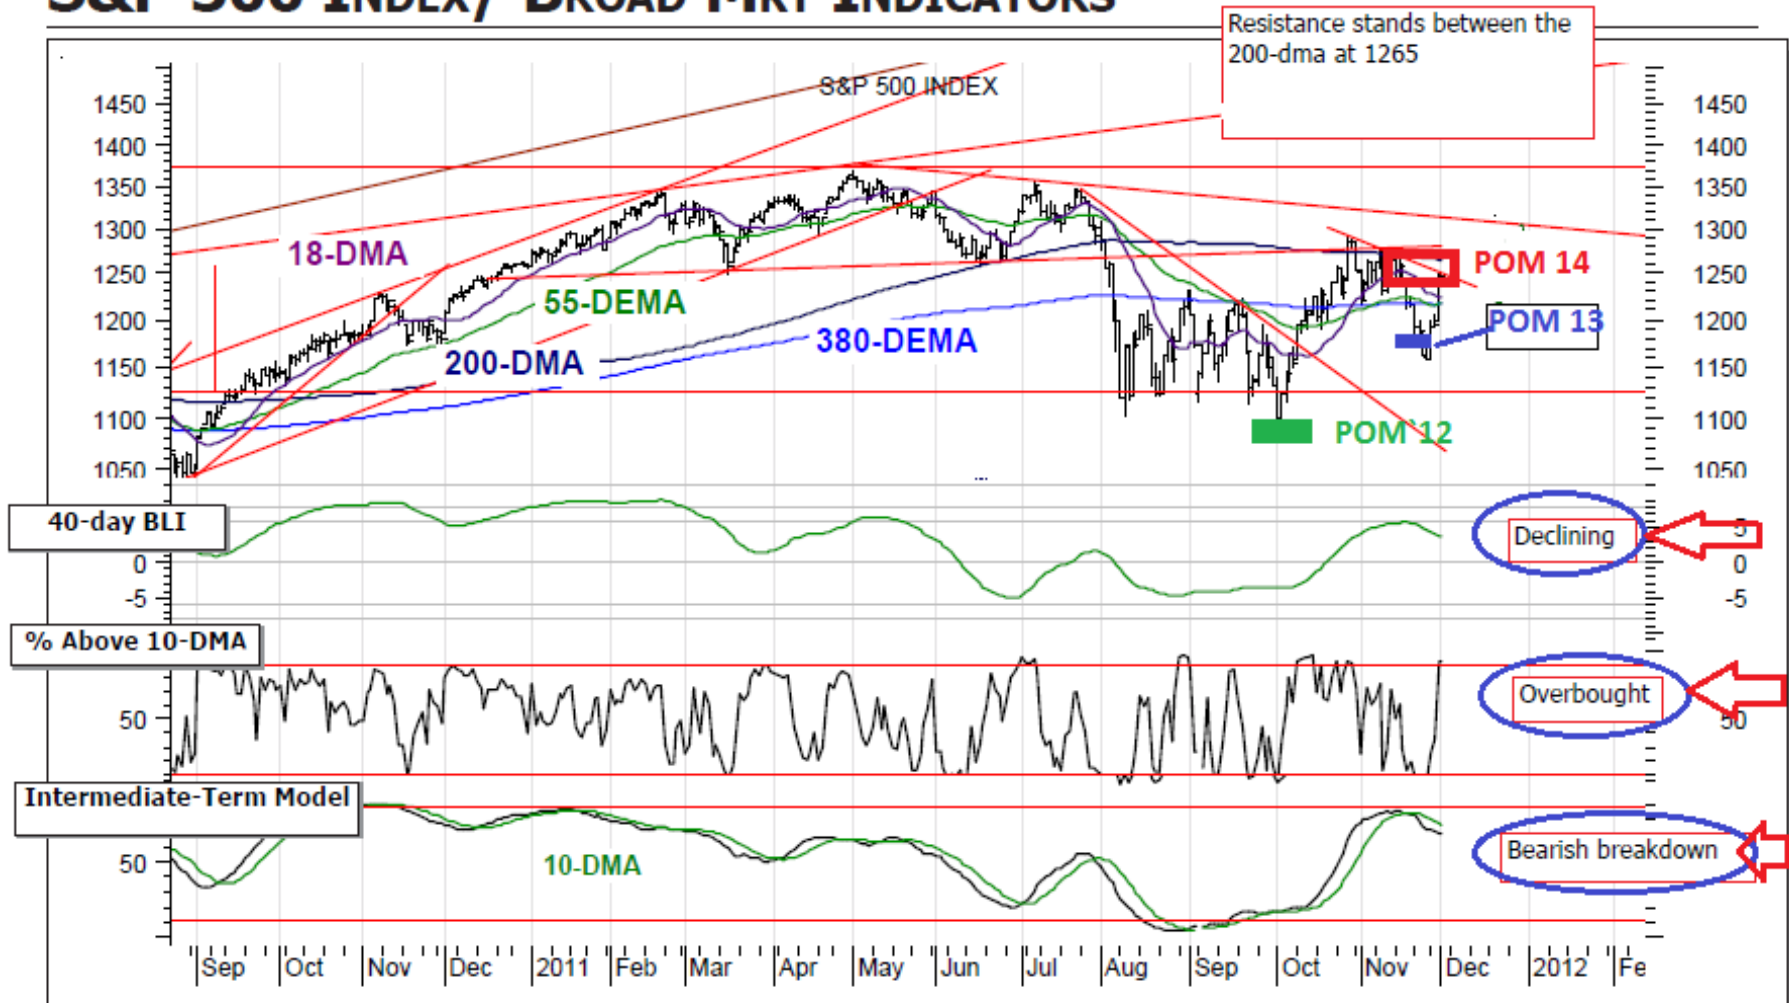

Earlier we had 3 Gap play on downside 1260 to 1160 which resulted back up again to 1260. Pattern work both ways

SPX - DMA , Trend & Oscillator Analysis

As we stand now, On Trend and DMA analysis , the POM 14 is being tested from underneath - BLI is peaking and We see breakdown in Intermediate term indicators indicated with arrows in chart below.

S&P 500 INDEX/ BROAD MKT INDICATORS

SPX – Wave Projection Analysis

So far Wave C has been Tacking well on bounce after (1 to 5) wave down . Now C is at the “NOSE” of breakdown Triangle and is into the POM 14 CZ.

Wave D should be the next decline, it should terminate around the CZ near Poly Trend Top 1100 in chart below. Oscillator has not Broken out in this last rally to suggest strength upward

RUSSELL – Poly Trend – Pattern Analysis – Lead JANUARY Indicator

Small Caps has tendency of leading in January.

But we have 2 powerful Opposing Poly Trend in overhead Pricing within its CZ 75-77. For any meaningful January effect, it needs to break through. The volume oscillator's attempted breakout was aborted. But, a pullback here could make another Run during year end up move.

- **SPX – MID TERM**

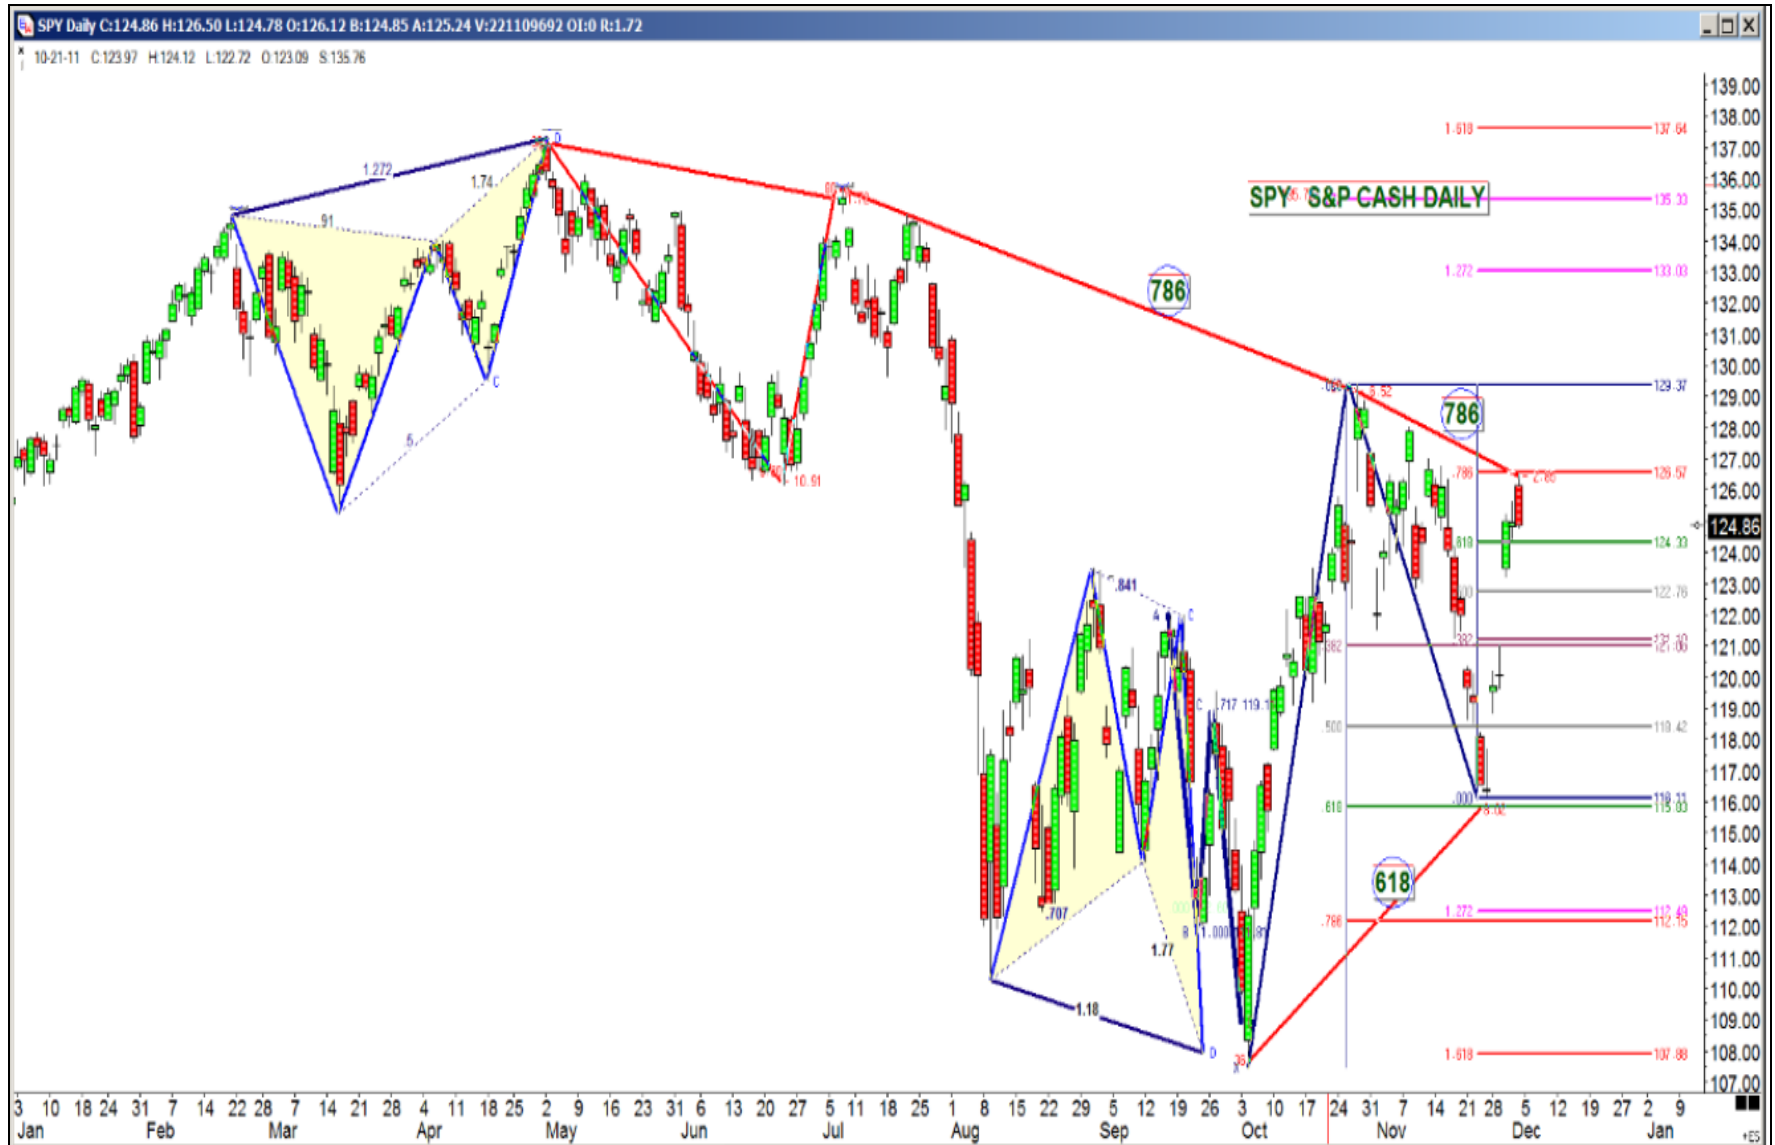

- **Tiggered@ POM 14 Re - CZ 1252 - 1275**

- ***Our First downside Target is at 1205 -1195***

- ***POM 14 oscillation ends at 1125 to restart***

SPX – PEC D

PEC – D projection of 618/786 is converging towards 1270 .

VIX v/s SPY – CZ & PEC –D Analysis

CZ is around 26-27 and PEC- D Pattern is at 26. We think this area should hold on decline .

- Advance / Decline - Analysis
- Put / Call Ratio - Analysis

NOTE : Various derivatives of A/D lines is required for full assessment

Our A/D Analysis is based on 3rd derivative complex A/D Oscillator instead of conventional A/D Line , secondly it needs to be conformed by the % of stocks above critical SMA's divergences. Based on current market condition our observation points out the following condition

- A/D Line NH / NL Ratio v/s NYSE on Equities only - MID TERM - **NON CONCLUSIVE**
- A/D Oscillator Volume v/s NYSE on Equities only - MID TERM- (See below)
- A/D Line NH v/s NYSE on Equities only - MID TERM - **NON CONCLUSIVE**
- A/D line_% BULLISH Equity 200D / 50 D - in SPX BREADTH - MID TERM (See below)
- SPX v/s CBOE – PUT / CALL RATIO on Multiple Derivatives MID TERM **NON CONCLUSIVE**
- *PUT / CALL on 3rd derivatives . Put / call Quantity based v/s \$\$ based Ratio on 5 DMA rotated every 3 weeks @ 0.75 of the month on “Weird Wally Wednesday” prior to Expiration . It tends to work well to identify bottoms but not for ST Top . At the tops we prefer the \$\$ weighted Put / Calls ONLY it gives better signal by different method we use- which is not extreme yet).*

SPX – A / D Oscillator – NH – NL - Mid term Bearish

The zero line on our New High - New Low Differential Indicator has once again presented a brick wall to further potential rally. For a big rally to get started, we need to see new highs running well ahead of new lows.

The lack of leadership moving to new highs is indicative that NO new leg up appears to have gotten started, but just a large oversold bounce instead. A rally to the top of the range.

SPX – A / D - 200 D Bullish / Bearish Ratio – Equity Breath - **Bearish**

A/D Line of 200D Equity ratio in spite of 1000 point rally past week, the Ratio is below 40. Since 2004, We had 3 occurrence (indicated by arrow) This has resulted in massive decline in SPX. (See chart below)

SPX – A / D - 50 D Bullish / Bearish Ratio – Equity Breath - **Bearish**

A/D Line of 50 D Equity ratio has reached 75 . This is critical area of topping in SPX . (See chart below)

- **SPX – LONGER TERM – (CAUTION)**

In spite of 1000 points rally - No Change from our Previous message & LT Charts

➤ ***Caution - we think the real decline would start initiated by 6 yr Cycle into 2014 based on the Charts and Indicators shown in Earlier message***

- ***SPX – EMA Cross with PPO***

SPX – WEEKLY – EMA – Cross – Long Term - Caution

In spite of 1000 point rally “Bearish cross” is still intact, This suggest this market is very weak . Long term 2000 to 2011 - the Indicator suggests the Large decline in SPX has began

Cycles - Inter market Analysis

SPX v/s OIL

Oil prices are back above 95 . Every time it exceeds 95 , the correction is due in SPX . Nov 3rd we had previewed this Co relation that resulted in nasty correction in SPX . We are currently in the similar situation .

EXTREAME Sentiment Analysis (3rd Party Data) - Courtesy : SENTIMENT TRADERS

- **SPY Liquidity Premium**

Liquidity is reaching some extreme areas where previous Tops in SPX has been Triggered

- **Time Cycle SPX**

Our Time - cycle Analysis is based Seasonality, Calendar events, Astros Harmonics, Geomagnetic (including Bradley Model) & T - Termination. Based on current market condition our observation points out the following condition

- **Bradleys - Cycle dates -**

DECEMBER is expected to be Down (wait and see)

- **Calendar Cycle - Cycle dates – Historically**

December is expected to be up (wait and see)

- **EVENT 1** - 8th Jan also coincides with CITI Group study for **Major market top 2011-2012**
- **EVENT 2** - 2011 is 3rd year of the presidential cycle and **historically has positive returns**

• Objective & POM / CZ Guidelines

Focus is on the Short & Intermediate term turning point of the SPX via POM's Price projections and / or CZ (Bullish & Bearish between the POM's) . POM is Unidirectional Judgmental Model, It utilizes multiple input signal via the Global Inter market Analysis (GIC), Price & Quality Volume (PQV), Pattern Recognition (PEC) , Cycles, Internal & External price equilibrium points to assists in output signals . POM is supplementary Analytics to add value to RA/ RI Framework for Risk Management.

- *SPX acts as Risk Benchmark for all the other Markets (Key US Indices & Key Global) , these Markets gets priced off SPX- Risk (in different Proportion) . Therefore within A # 1 – MS Report, our critical component being SPX and its internal ingredients for timely POM & Bullish CZ calls . Our A # 2 – MS Report focuses on Broader Indices and Global Indices.*
- *All the Broader Indices tends to follows the Price path of POM 11, 12, 13 of SPX (except @ POM14, 15), various Instruments will Top out at different time to Trigger CZ – Validation for NET SHORT.*
- *SPX is still following the Bear Market / Trading Market POM Regimes unlike GOLD market*
- *All CZ / PEC D / POM's – Marked on charts (in color) below has been Announced on Real time in our Previous Reports prior to Price shifts.*
- *Stops always on other side of CZ @ value based on Portfolio's Objectives and Risk tolerance*
- *POM Conclusions to be cross verified by other methods prior to final decision*
- *For Maximum utilization of POM / PEC –D Process for Risk Management. Refer to guidelines within the Appendix below*

➤ Key Points for Full utilization of SP- Reports

- Maximum Utilization of various POM's , CZ's & ABC's – for Risk Management & full enhancements on CZ pricing & CZ-PQV Timeliness

- At Top down Level – Triggers around POM's -Mid term & CZ's - Short term – (CZ's happens in between the POM's) . Critical component for Clean execution is to maintain ongoing updated data base spreadsheet of CZ's Pre announced in SP releases prior to price shifts. These inputs when Computerized Daily Monitoring, Triggers, Timely PQV validations, Price projections Alerts on real time should warn in timely manner to take action. .

- Rebalancing Pre Planned procedure at Triggers – “ Rebalancing % of Overall Position Sizing” , Beta & , Net Exposures sizing depending on each Portfolio's Objective & Risks Tolerances for either Recycling of Capital or Fresh capital.

- Key points for Risk Management

- Hard Stops around CZ's

- STOP SELL- “ early warning Alerts” in fast moving markets, Over night Day / Night (IST) time delay Risks.

- Cross verification by Other Methods

Computerized Daily Monitoring, CZ Triggers, Timely PQV validations

- 2. CZ – Tracking

- Programing - “Time/ Price Displacement, Supply / demand Activity Bar Analysis” –

- At “Institutional Grade - Price , Volume with Time Integration

- Supply / Demand Activity bar Analysis – Real time.

- Candlestick – Price displacement Algo Programing experience at CZ Validation for Triggers

• Past 52 Week - POM / CZ - SPX Signal - updated 7th May 2011

• 2010 - POM - SPX Signal

POM criteria for Implementation on SPX

- POM is rated from 10 to 15
- POM 14 , 15 (is Sell Signal) and 12 , 11 (is Buy Signal) both are the Actionable Area whereas POM 13 is A Neutral Signal for Risk management
- On way UP move, POM 13 signifies to STOP executing additional “New Buys” that was initiated at POM 12 or POM 11 levels
- On way DOWN move, POM 13 signifies to STOP executing additional “ New Short Sells” that was initiated at POM 14 or POM 15 levels
- (Bear Markets) POM 15 is for - Net Short & POM 14 is for - Hedge Longs
- (Bull Markets) POM 15 is for -Hedge Longs & POM 14 is for - Partial Hedge
- POM 12 & 11 is for Net Long
- POM 10 is Climatic Crash low Buy Signal to add to Net long position (Rear event)

• EXTREAME Sentiment Analysis (3rd Party Data)

Courtesy : SENTIMENT TRADERS

Our Sentiment Analysis has “Intermediate & Short term” composition. We evaluate (8- 9) Indicators for sentiments out of which some are working well for Short term and other for Intermediate terms These are either Numerical Indicators as the Investors sentiments is expressed through purchases of the market

Rydex flow, Insiders activity. The Emotional / Survey sentiments we track Investors Intelligence sentiment Advisors sentiments. etc. All these are Integral part of POM composition ,

Our Behavior Indicators Commercial Hedges , AAll etc Sentiment Indicators, Insiders activity, Speculation activity,

Based on current market condition and the probability of Indicators we point out the EXTERME INDICATOR ONLY as a observation points.

- **Daily SPX - “ Trend Adjusted Signal”**

- **3x3 /9EMA – Break Indicator**

The process utilizes the cumulative Algorithm of price trails 3x3 / 9EMA input signals for Trend formation. This signal tends to work well in Market extensions (i.e. Post POM 14).

This Methodology is implemented by Program Traders especially in Momentum extensions and diagonal triangle formation Trend-following system which bases its reversal signals on breaking a significant closing Break Indicator I to confirm the new trend. (it's important to use a stop if you act on a signal). The reversal price is generated on the close of a bar. (The drawback of strategy is that it can whip saw).

INTERNALS OF 3X3- 9EMA – Break Indicator.

The line break indicator has captured the post POM 14 Moves on a mechanical basis. Although can't guarantee it will continue. But, even if it misses on occasion , it's still is the best indicator we've ever seen in Market for extensions.

Tight trading ranges tend to cause whipsaws and those are environments where trading multiple markets can help for diversification, in SPX & DOW. The reason is that we have a purely mechanical indicator, our line break indicator, that is much better to use. That indicator has proven extremely good over the past several months in many markets in many extensions.

As a reminder of how simple this indicator is, when the market closes above the "break" price level, the indicator is ""bullish"; when the market closes below the break price, the indicator is then "bearish". at the close
