• Objective

The Weekly Validated Sector selection is to Setup “ Global Long / Short – Market Neutral ETF Index” –(Equally Weighted) Utilizing SD, POMs & SETUP INDEX within RA / RI framework with composition of ETF’s with SD # 1.5 to 2 Overvalued and Undervalued characteristics. Additional direction bias is given via doubling on ETF’s with extremes SD # 2 & POM conditions.

The Focus is to derive and compare the Relative performance of various Sector ETFs via using Standard Deviation (SD) Criteria, POM – SPX Methodology as a PIVOT point for start then use with SECTOR / SPX Ratio chart for their “Pattern Recognition and Technical Analysis” for OVERVALUATION AND UNDERVALUATION of Sectors.

Step 1 – Qualify the Sector based on Correlation Ratio Analysis with SPX to determine Standard Deviation (SD # 1.5 to 2) @ extremes level to define “Overvaluation and Undervaluation” of the SECTOR

Step 2 - Overlay this Correlation input data on Sector’s Relative strengths based on the SPX –POM latest STATUS as Pivot point to measure Maximum and Minimum strength of the Sector. Validate those ideas via technical Patterns of absolute Charts & SPX Ratio charts of these Sectors for Bullish and Bearish SETUPS via Pattern Recognition, Technical Analysis via second derivative DMA’s

QQQQ - POM - LT - Price , Volume & Pattern Analysis

QQQQ is testing Oct 08 highs of 55 , Previously it tested the breakdown area of Oct 08 of 54 with 65% lighter volume
If the test of 55 with 100 M shares and close below 54 would be failure (This is a better failure) , On risk reward as always
the stop on other side of CZ.

QQQQ - POM - ST - Price , Volume & Pattern Analysis

On Shorter term, QQQQ tested 54 with 53 M v/s 53 required within CZ & 5-7% and now close below 54 would be failure , if SPX fails before NASD , then QQQQ may fail prematurely (without going higher then 55)

IWM – Correlation Ratio Analysis with SPX – 365 days Time basis

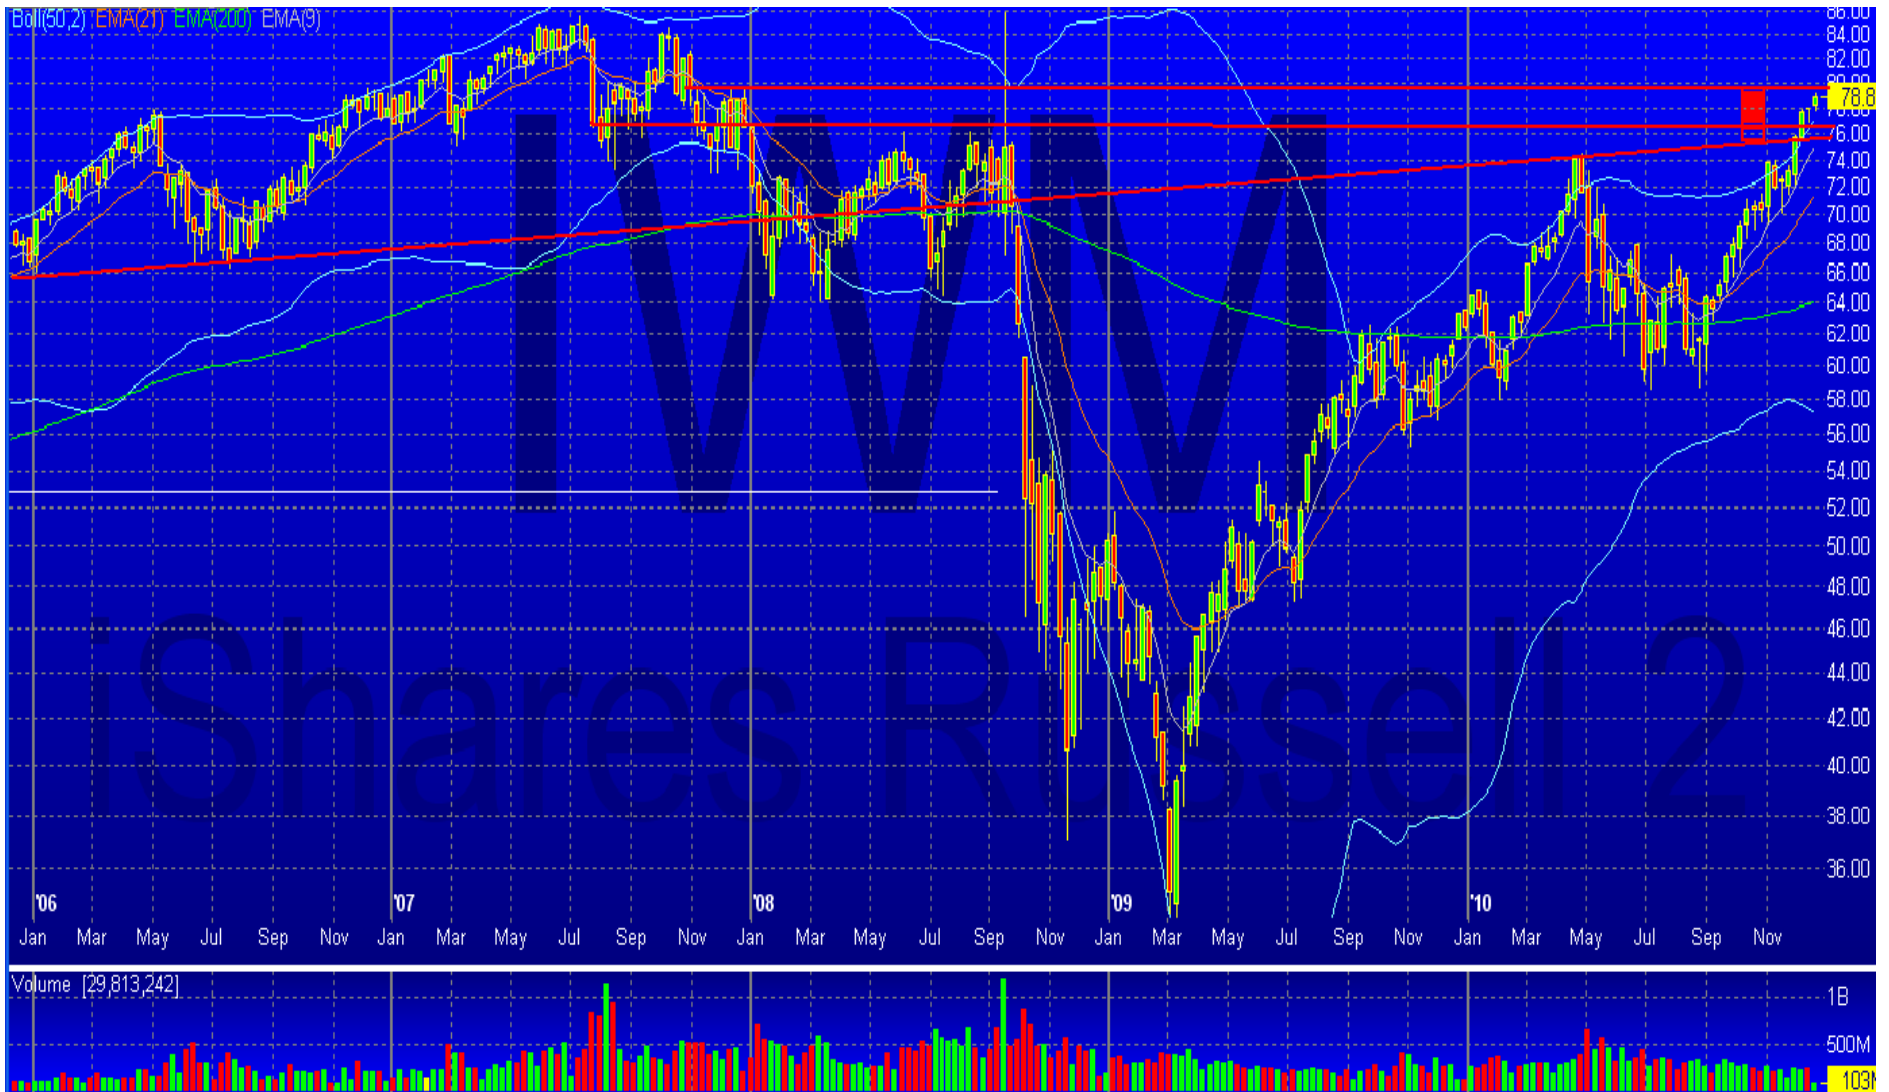

SD # 2.0 has just reached extremes

WE HAVE COVERED THIS IN DETAIL IN MS A # 2 – Yesterdays Report

IWM- POM – LT - Price , Volume & Pattern Analysis - (MONITORING CZ –PQV)

IWM did not validate the PQV – CZ test in first get go and got extended with heavier volume then our benchmark. Currently it is testing 2008 Jan breakdown area & 2008 highs of Sept an its derived CZ of 76.50 – 80.00 (currently it is in the zone) and test with 175 M and weekly close under 75.50 should be a good test If SPX declines this will follow.

EEM- POM – LT / ST – Key points

- **EEM is closely related with SPX on downside when SPX signal is at POM 15 , EEM acts with the texture of POM 14 . Conversely Our in-depth Analysis suggest that SPX 's POM – Buys POM 11,12 are closely related with the buys of EEM 's.**
- **SD # Levels are at + 1.0 SD and Neural Zone , but any bounce should take to Target Zone into +2.0 SD, we should monitor this**
- **Charts below gives different possibility in different time frame with volume study**

EEM – Trend line & SMA Analysis

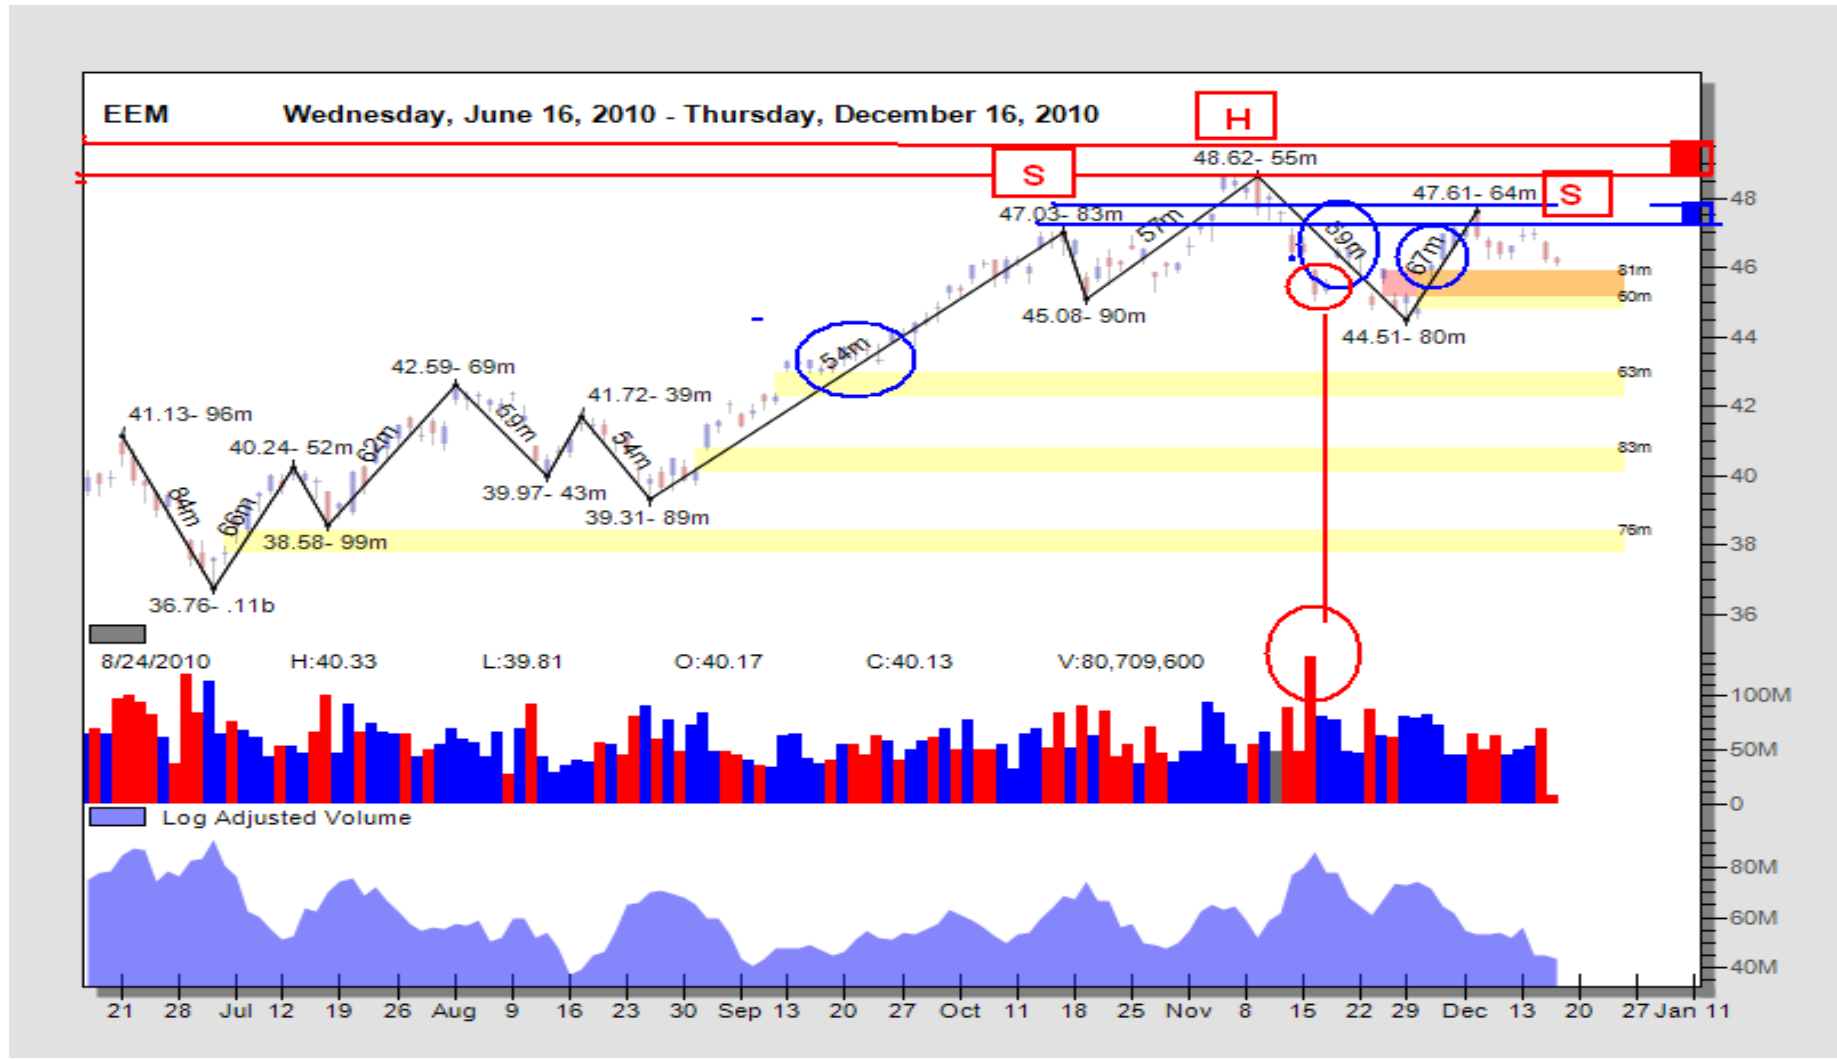

By this method , this is a Bearish Setup, these reversal are good probability patterns.

Emerging Market		EEM
Last: \$	46.96	
Chg: \$	0.07	0.15%

EEM- POM – ST - Price , Volume & Pattern Analysis

Since our last update , Our CZ of Head and Shoulder passed successfully with close of 47 and volume tests as Indicated
 If SPX fails, then we may not get to the CZ of 48 -50 ,. The needs to be 40 M & price close below 48 . That would Top , On
 risk reward as always the stop on other side of CZ. (If volume pick up more than 40M and we could certainly not pass the
 test., that is what if ??)

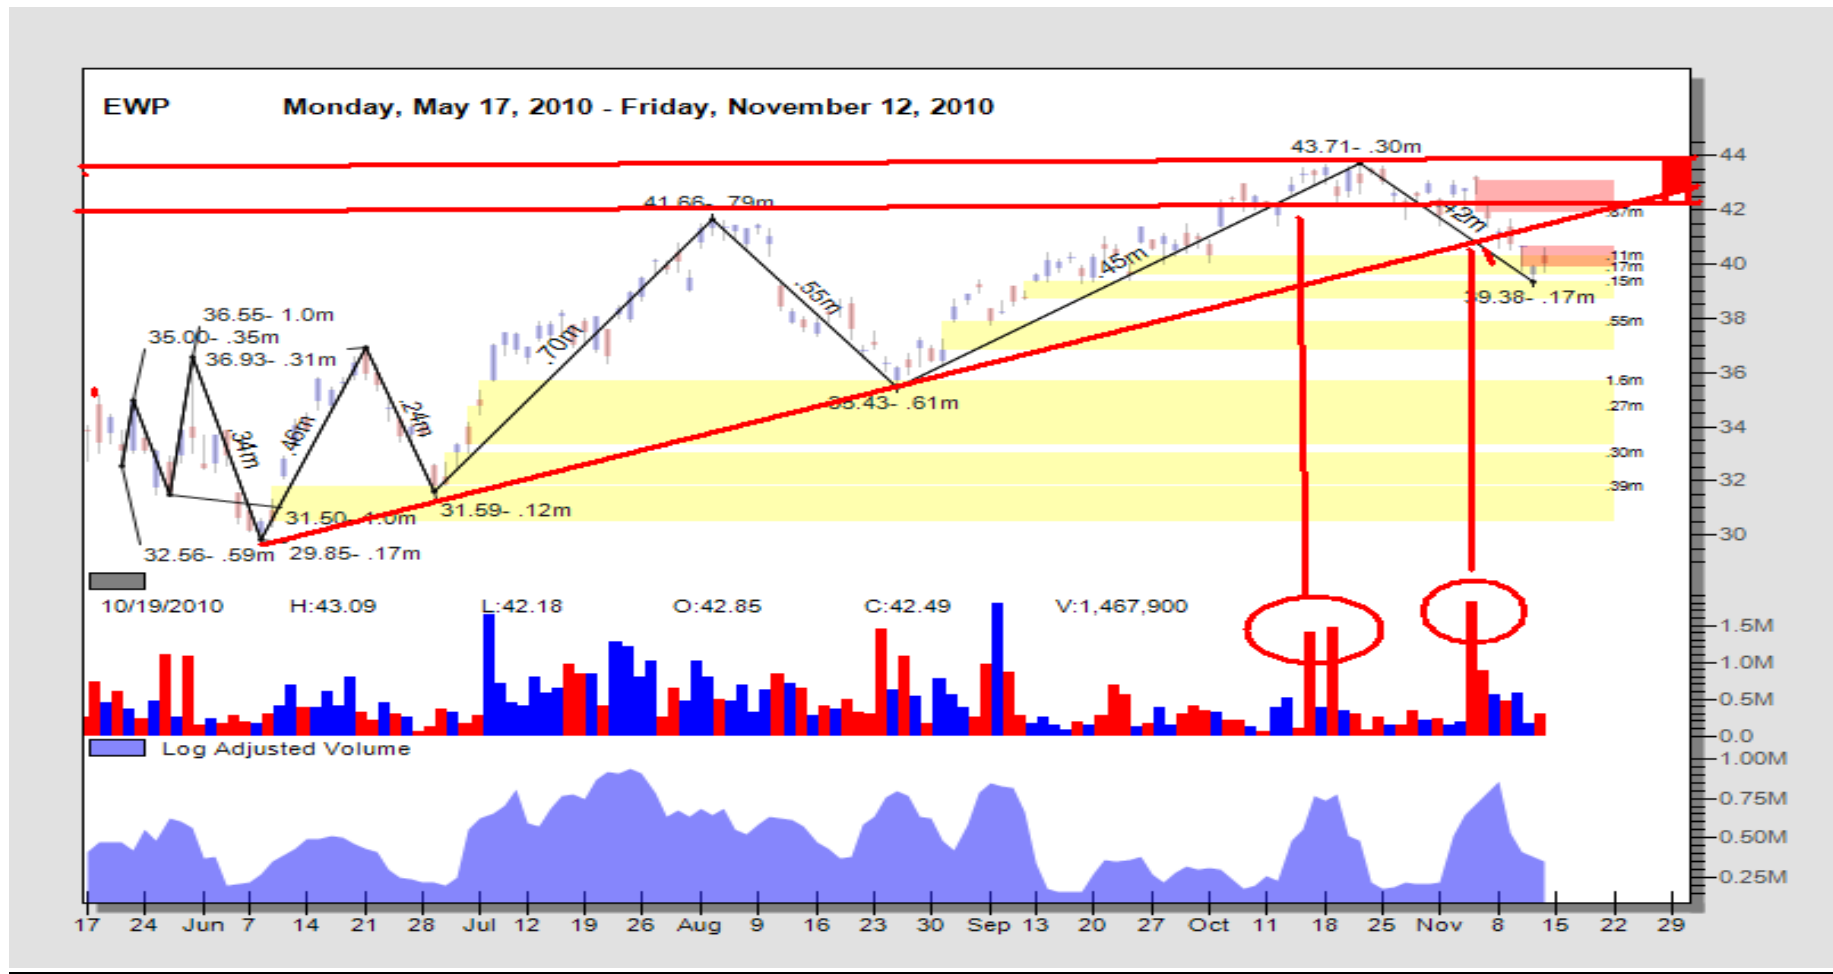

EEM- POM – LT - Price , Volume & Pattern Analysis

Heads up - As a worst case scenario if volume exceeds 40 M then test the Previous swing highs of May 08 at 52 and breakdown area of Jan 08 of 49. is wide open similar to what happened to IWM. (but we wait till it proves itself via volume study) We don't know yet it will get there or not in prices. We will do the volume study if it gets there along with SD # 2, levels for 2nd visit

EWP – PRICE & VOLUME ACTION

- **CONFLUENCE ZONE 41.5 - 44 , with 0.4 m volume test.** In the bigger picture , this market bounced back 50% from the bottom into the breakdown area with 35% lighter volume ,
- In the current decline volume in the down move has picked up as indicated (Fundamental stated in our A # 1 report)
- In PQV INDEX – ½ position at 40.40 yesterday and other half at Confluence Zone

EWH – Correlation Ratio Analysis with SPX – 365 days Time basis

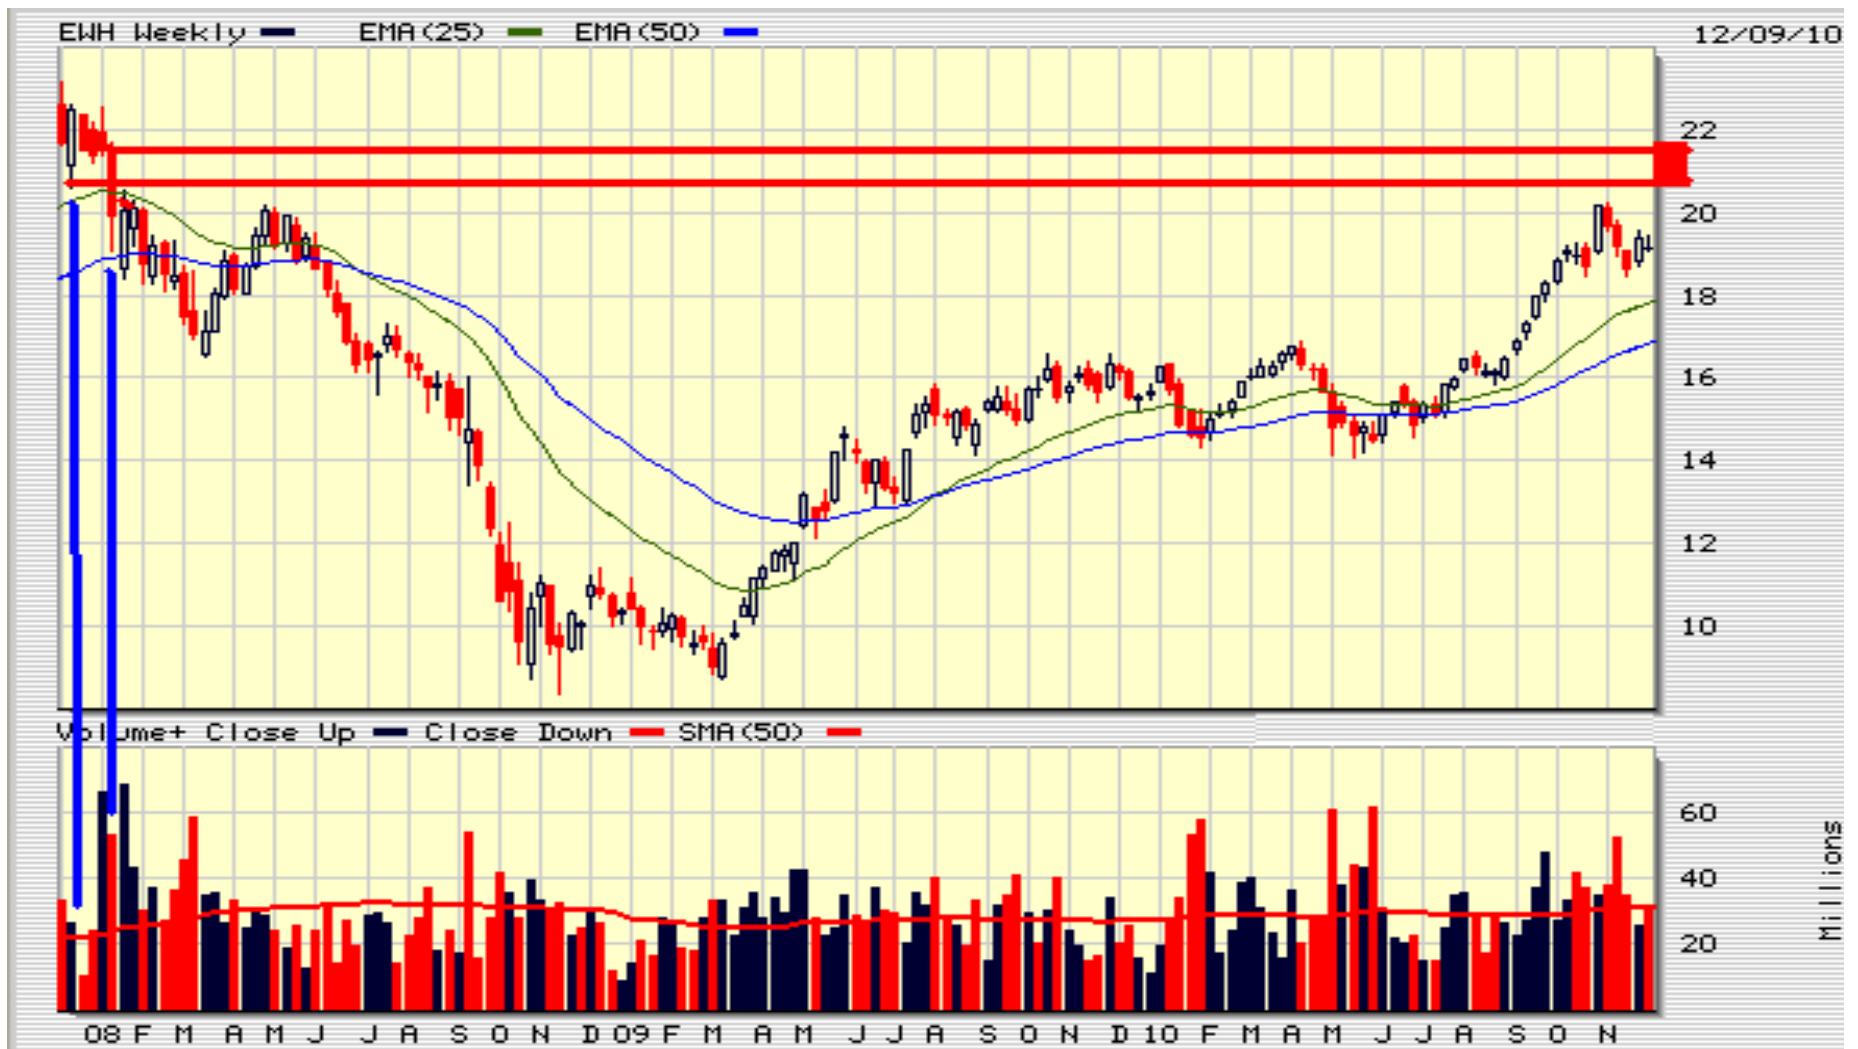

SD# is at + 1.25 for overvaluation

Long EWH Equity and Short SPX Index, Updated till 08 Dec 2010

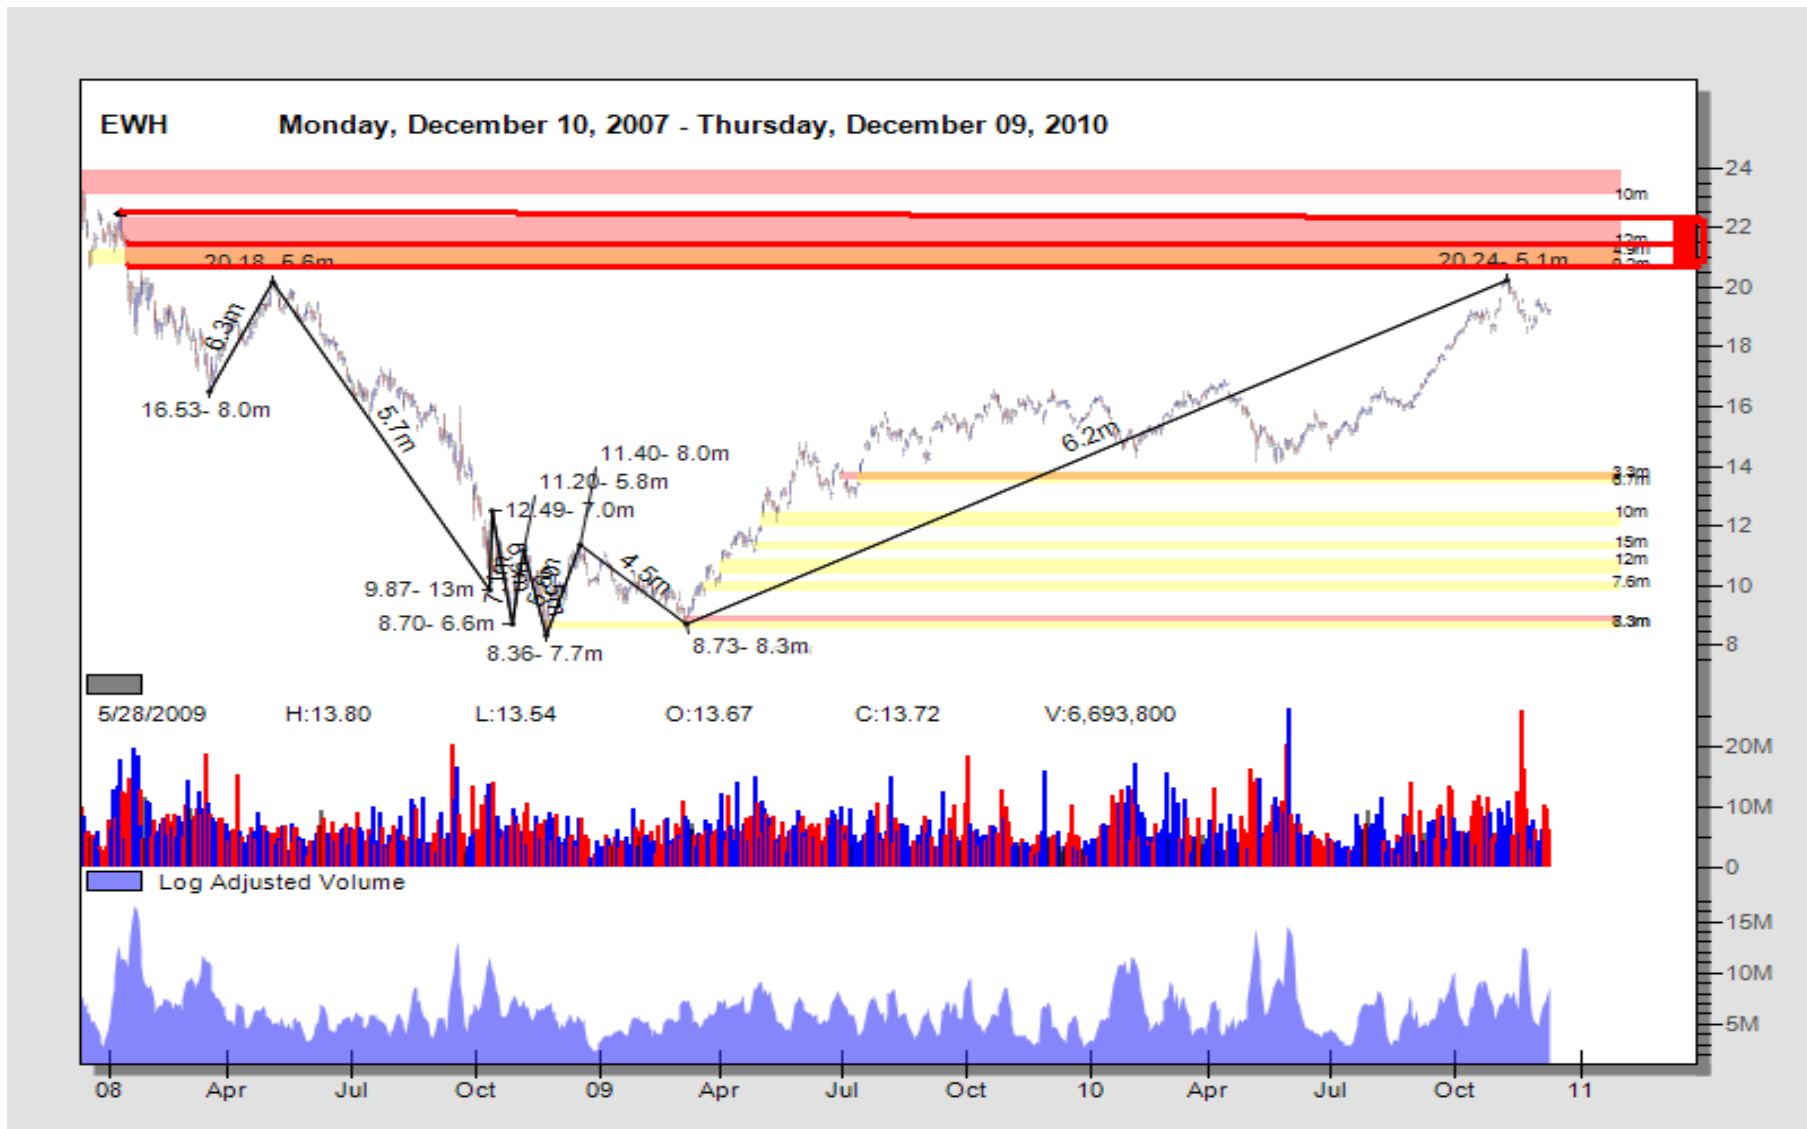

EWH - POM - LT - Price , Volume & Pattern Analysis

Backdrop - as a worst case scenario EWH may test the Previous breakdown area of Dec 07 of 22 & Jan 08 at 21. We don't know yet it will get there or not in prices but (This will be a better failure), as this would depend on SPX failure. If EWH gets to these price point , we may as well get SD # 2 and above, currently SD is at # 1.25

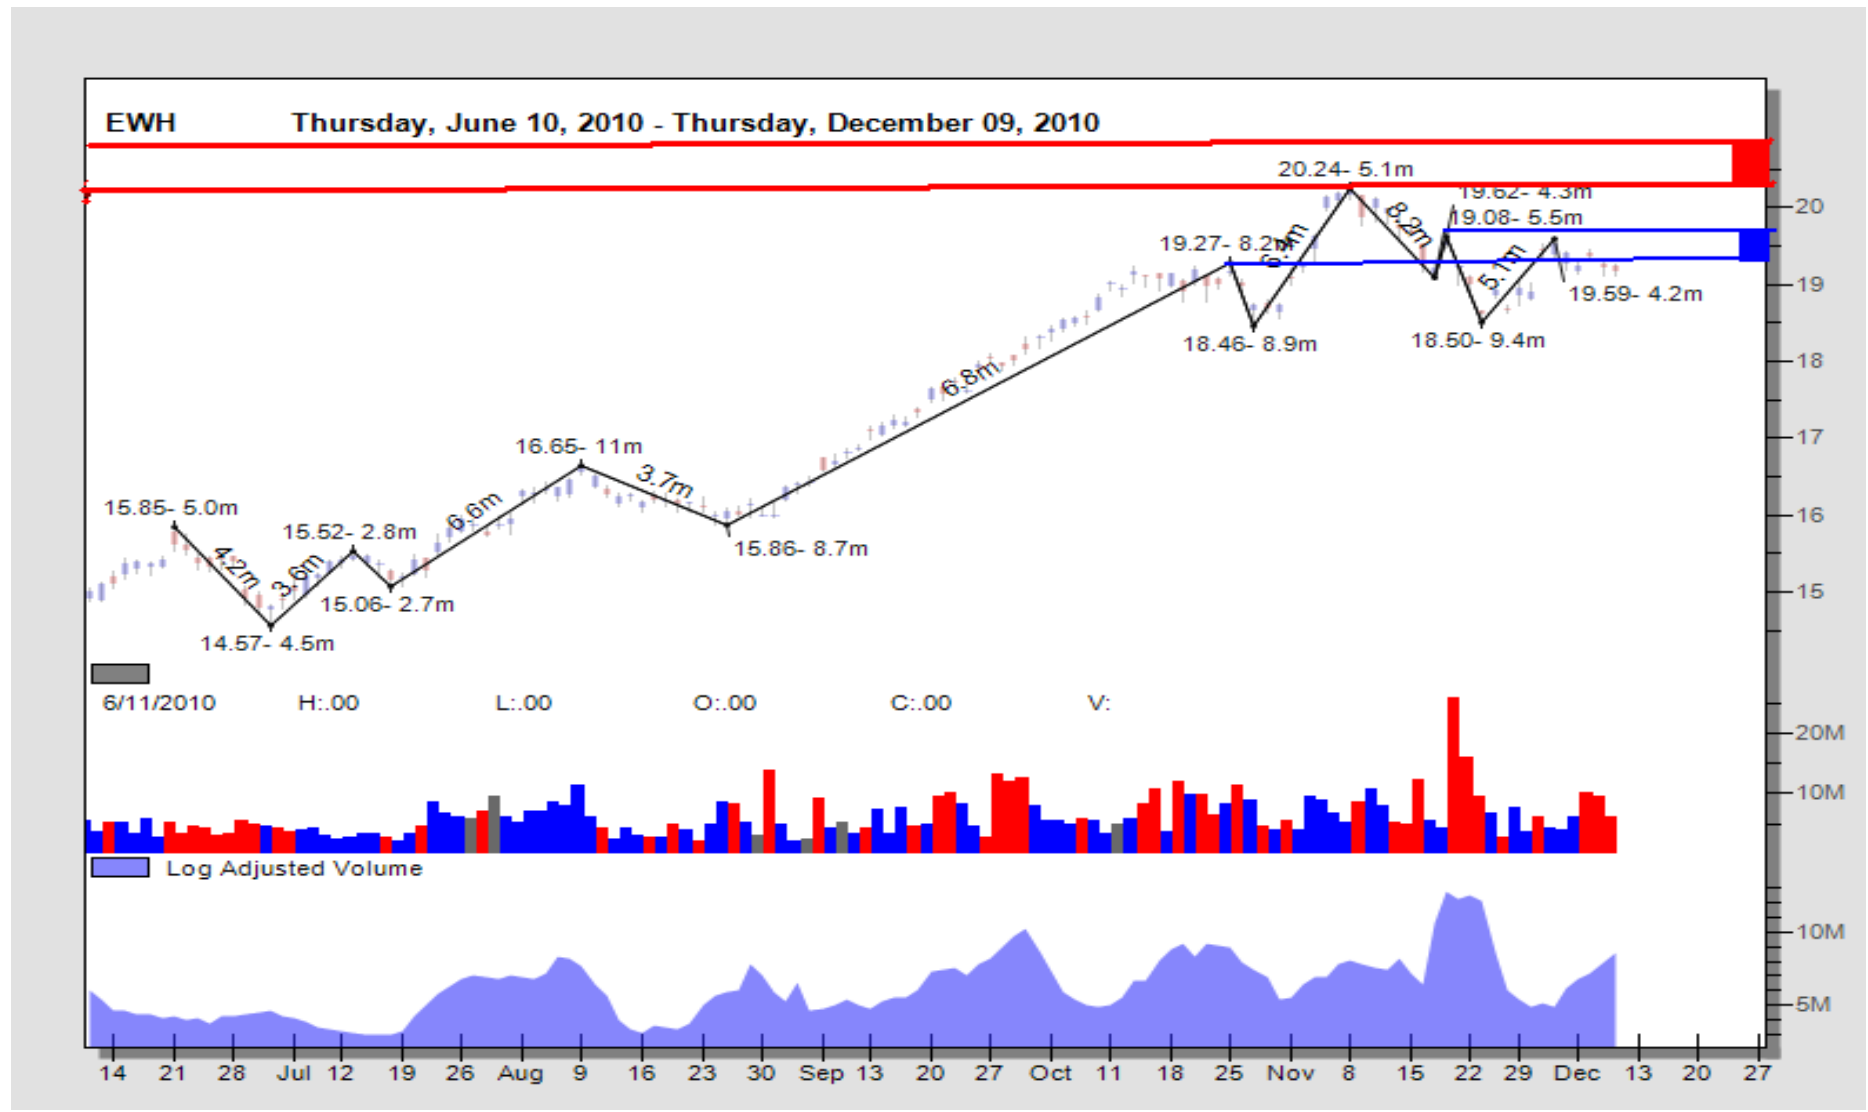

EWH- POM – MT - Price , Volume & Pattern Analysis

The CZ is 21- 22 and needs 5 M for test and price close below 21.5 . That would Top , On risk reward as always the stop on other side of CZ. If there is one final seasonality rally

EWH - POM - ST - Price , Volume & Pattern Analysis

There is a possibility, if SPX fails, then we look for EWH to enter in this area of H & S 's CZ of 19.25 to 19.75 to fail, the volume should come in at 4.5 M and close under 19.25 . On Shorter term, there is a H & S Top is in place .

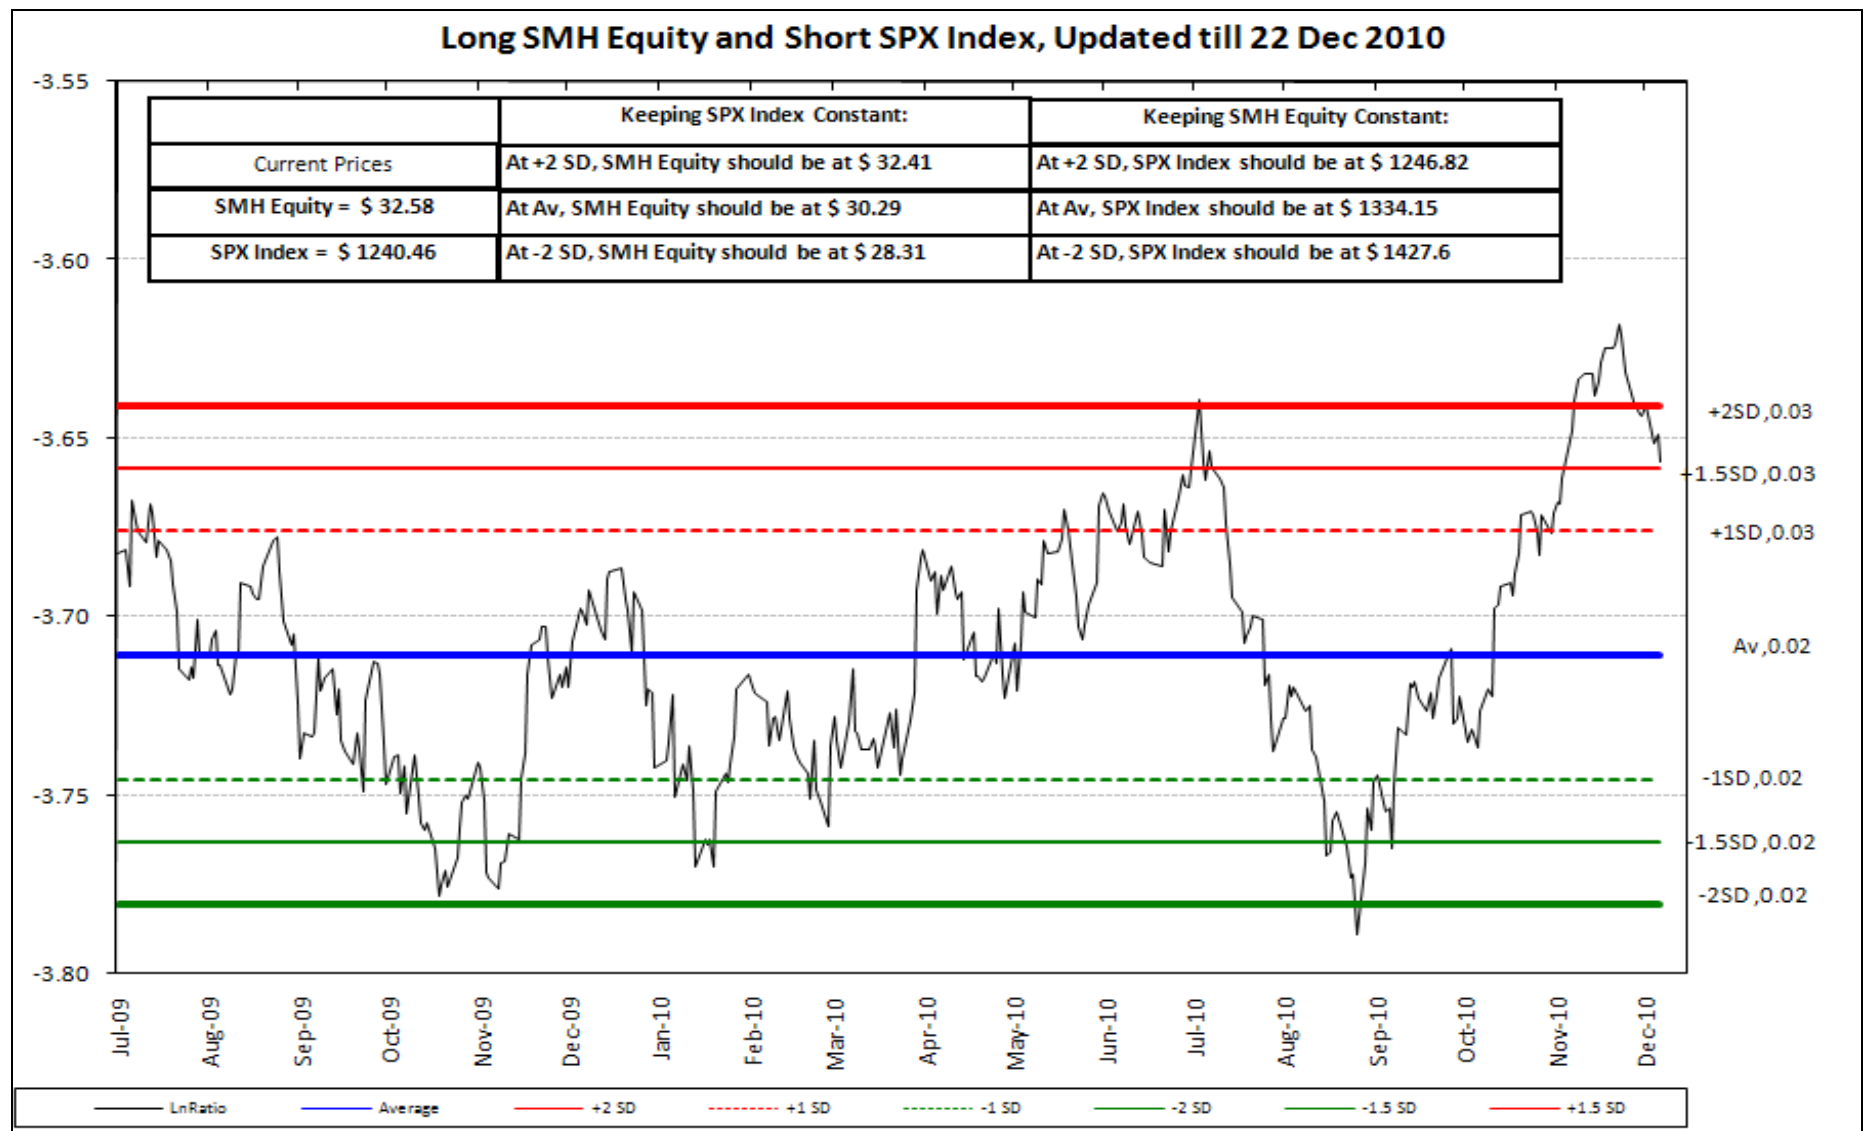

EWH – Technical & Pattern Analysis & Price / Volume

On Daily charts , It is a Bearish Head and Shoulder pattern with volume confirming it as well on the secondary test . **RSI Diverging with at Head Level and has diverged at Shoulder level. Volume came out of this ETF on Sell side as circled in Red** . This a bearish Set up. If SPX put in a Top here, it might coincide with it this as well at Head & Shoulder CZ might prove its merit .

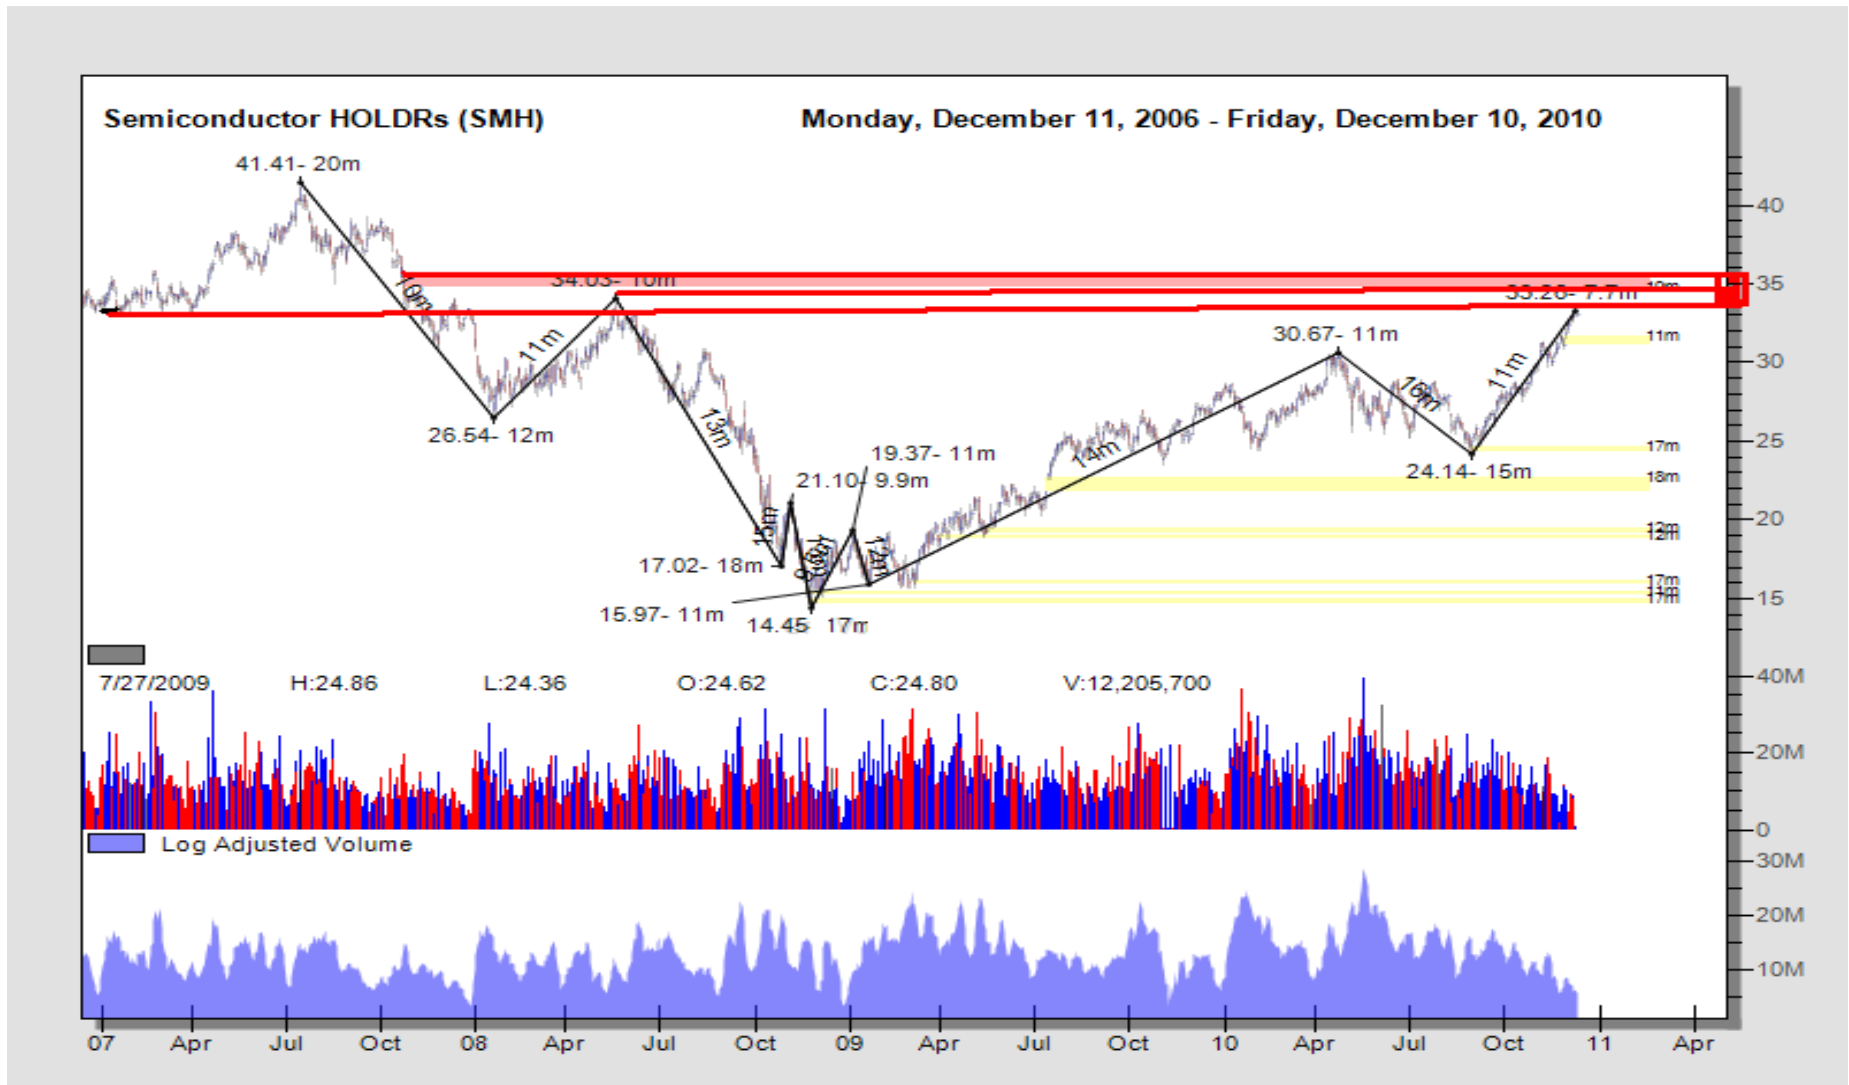

SMH – Correlation Ratio Analysis with SPX – 365 days Time basis

SD # 2.0 has just reached extremes

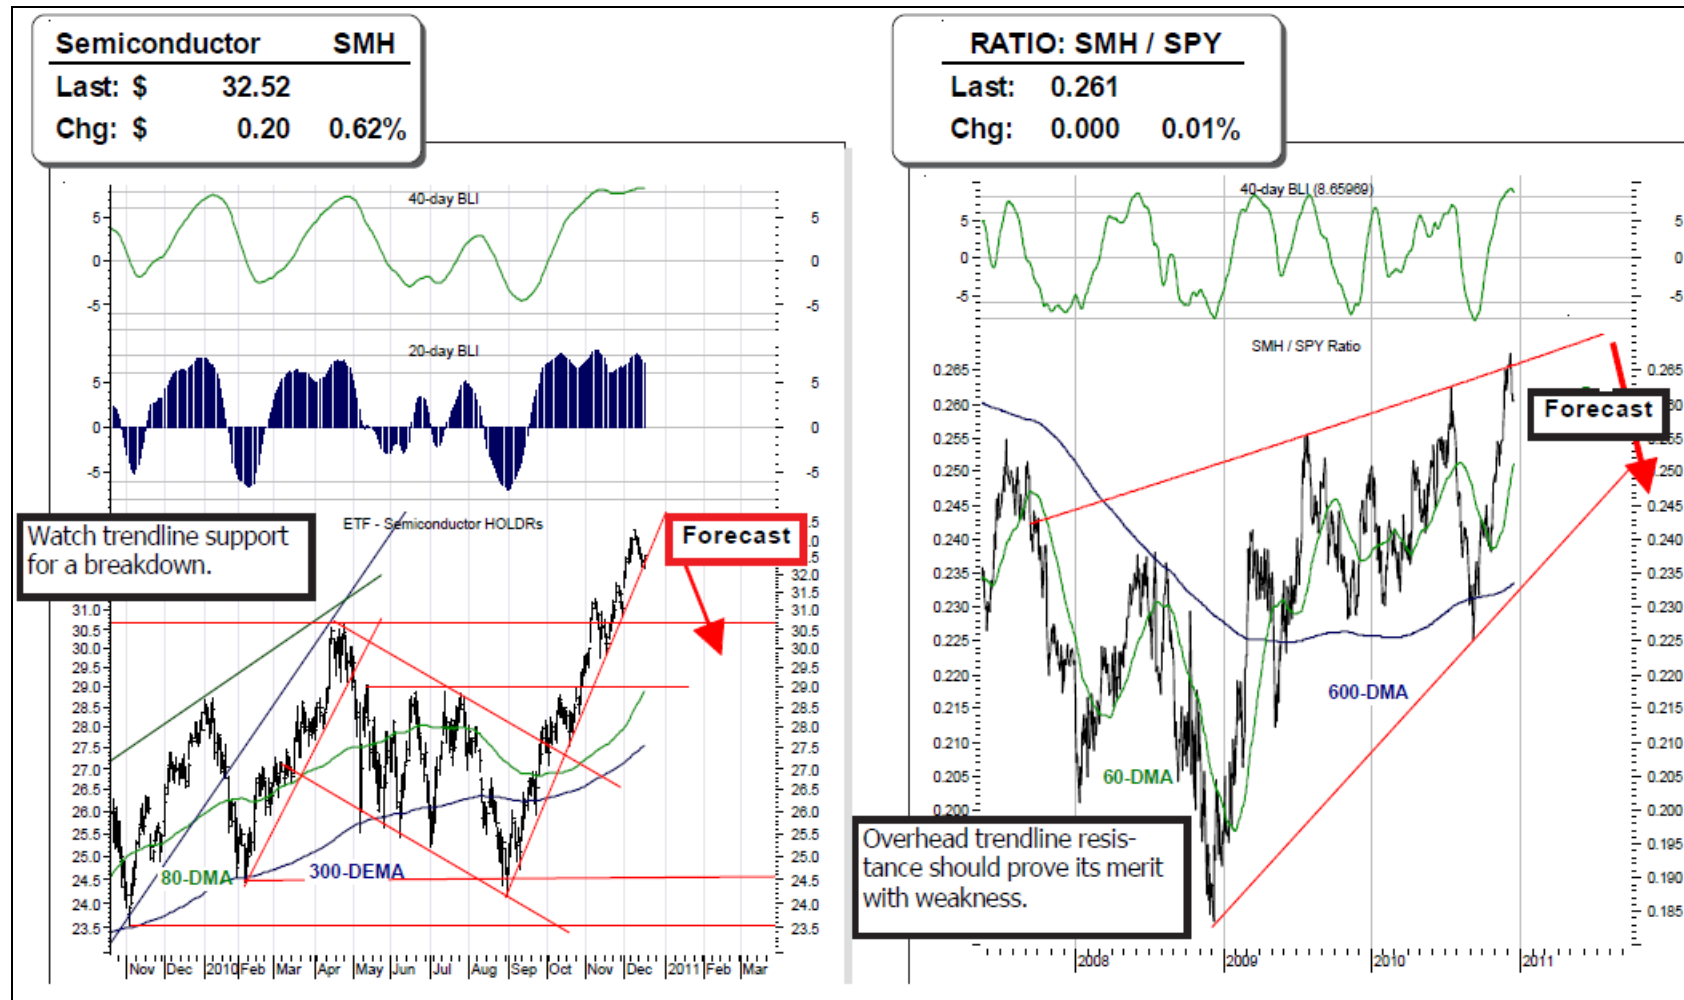

1- SMH – Technical & Pattern Analysis & Price / Volume (**No Change – No test**)

SMH came very close to our test zone defined by May 08 at 34 and breakdown area of Jan 08 of 33 as this would depend on SPX failure. There is a possibility, if SPX fails, then we look for SHM to fail as well and CZ might not get tested. CZ for SMH is 34 -36 and volume on test to be 8M and close below 34. That would Top, On risk reward as always the stop on other side of CZ.

SMH– Technical & Pattern Analysis –

The SMH / SPX ratio chart looks bearish and should trend down in RH side chart below, confirms the relative fall in SMH / SPX (hence overvalued) by this matrix in Sync with SD Analysis.

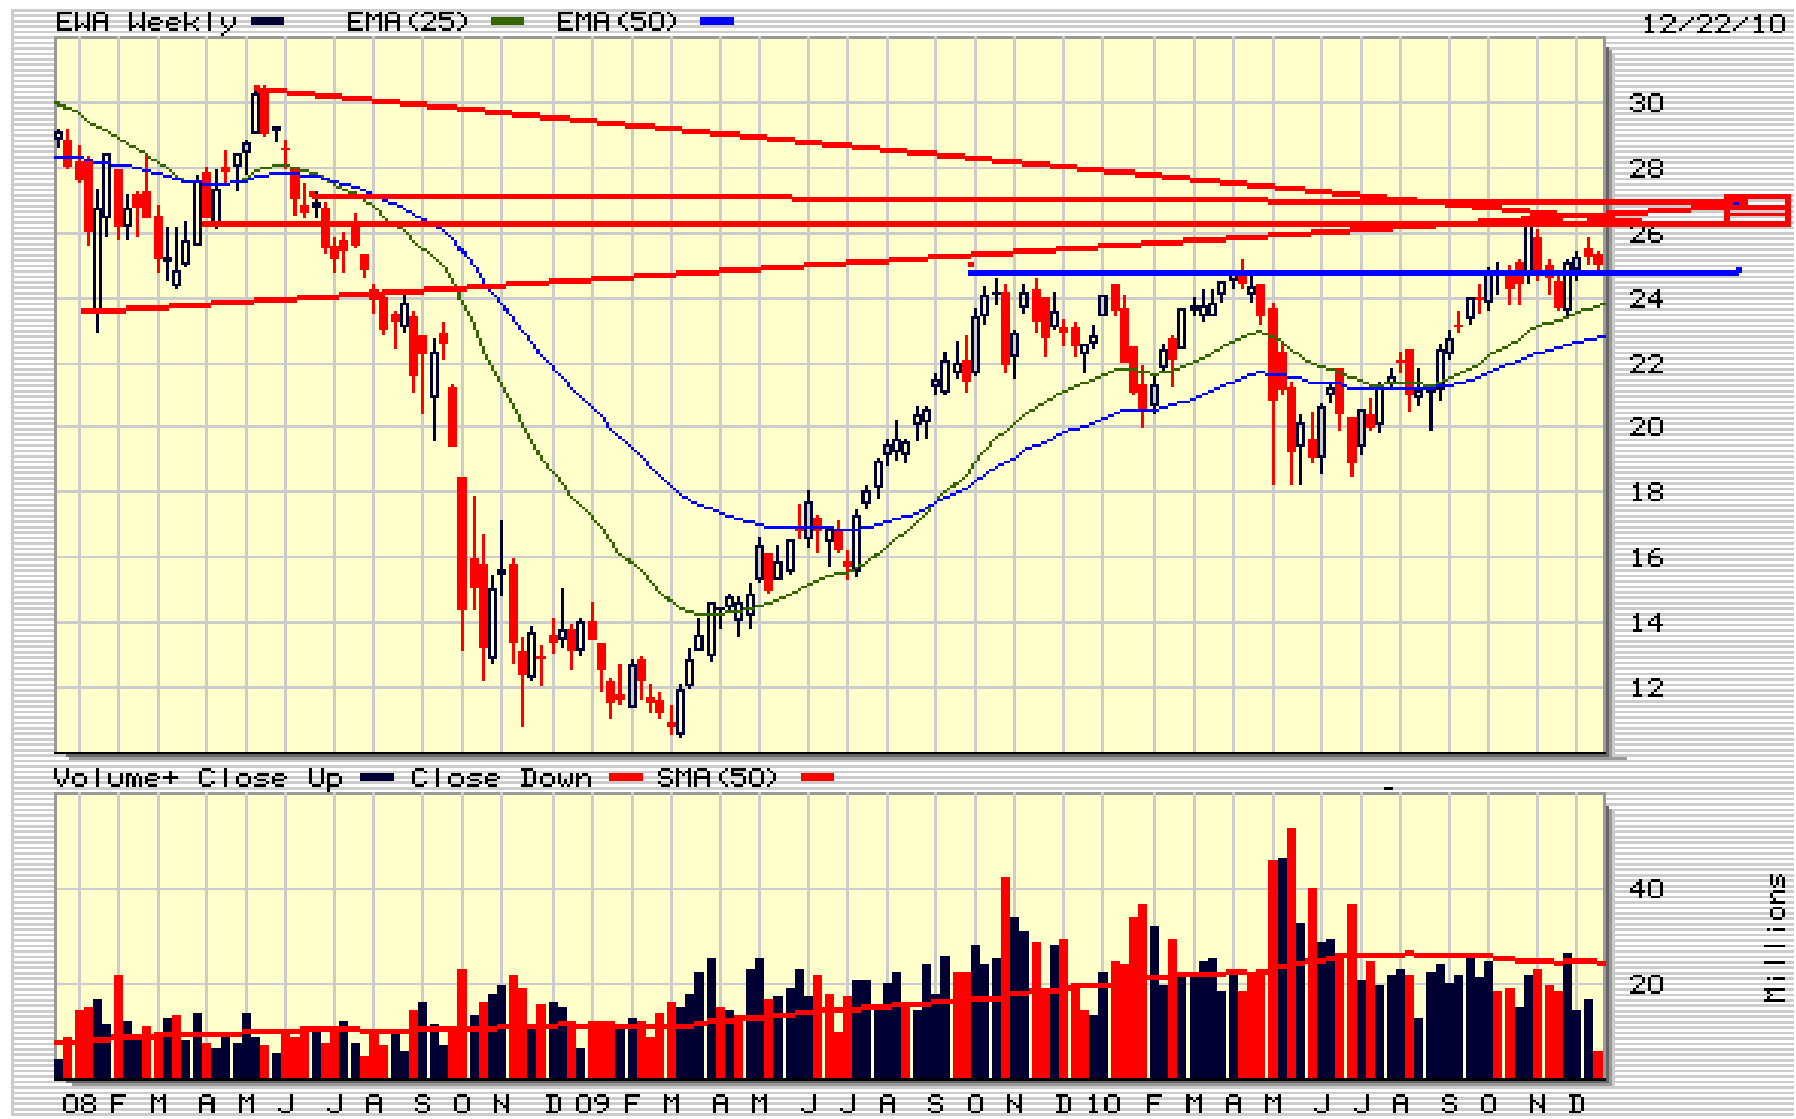

EWA- POM – LT / ST – Key Points

- **SD # Levels are below +1.0 SD and Neural Zone ,**
- **EWA is closely related with Commodity Market which in turns tied up with USD , if DXY rally's ,SPX should decline and so as EWA follow on downside**
- **Currently SPX is at POM 14 and EWA belongs to AOM**

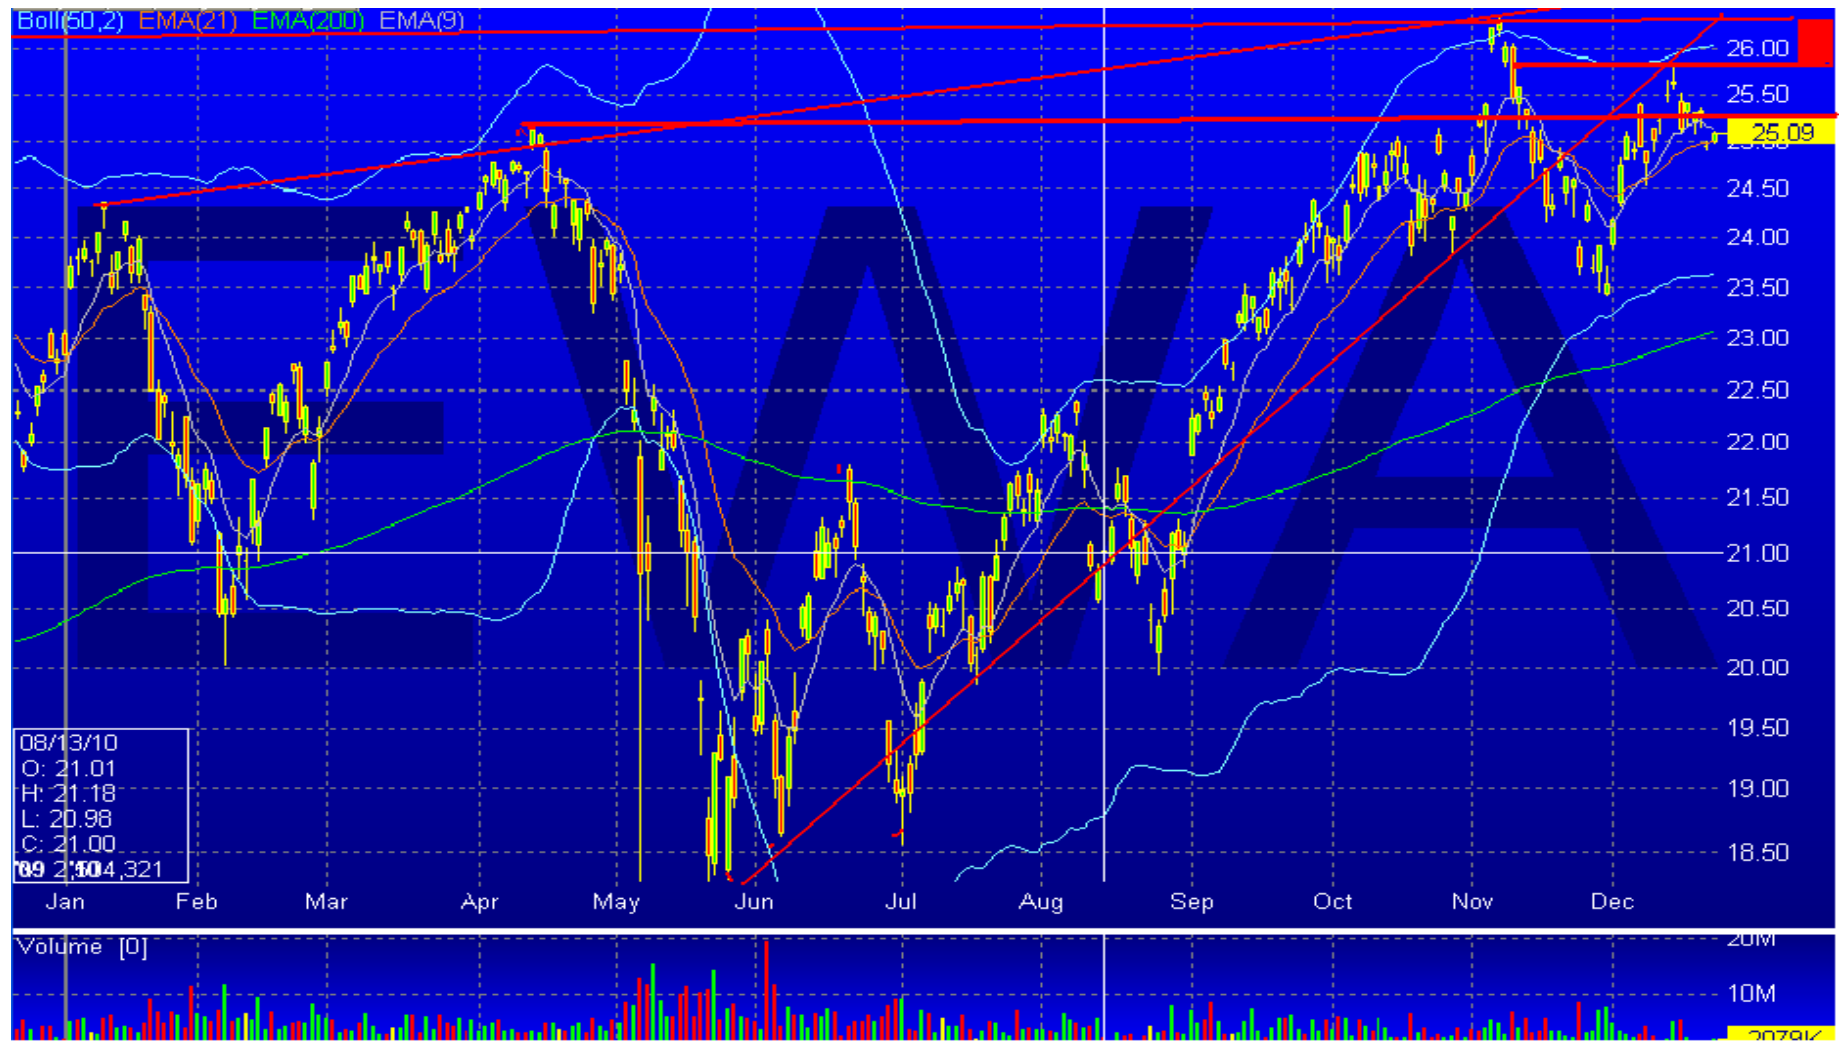

EWA – Wkly - Technical & Pattern Analysis & Price / Volume

The best Risk / reward would come in the CZ test of 26 -27 and test with 16 M weekly & close under 25.75 (weekly) should be a good test. But if SPX declines this will follow.

EWA – Short term - Technical & Pattern Analysis & Price / Volume

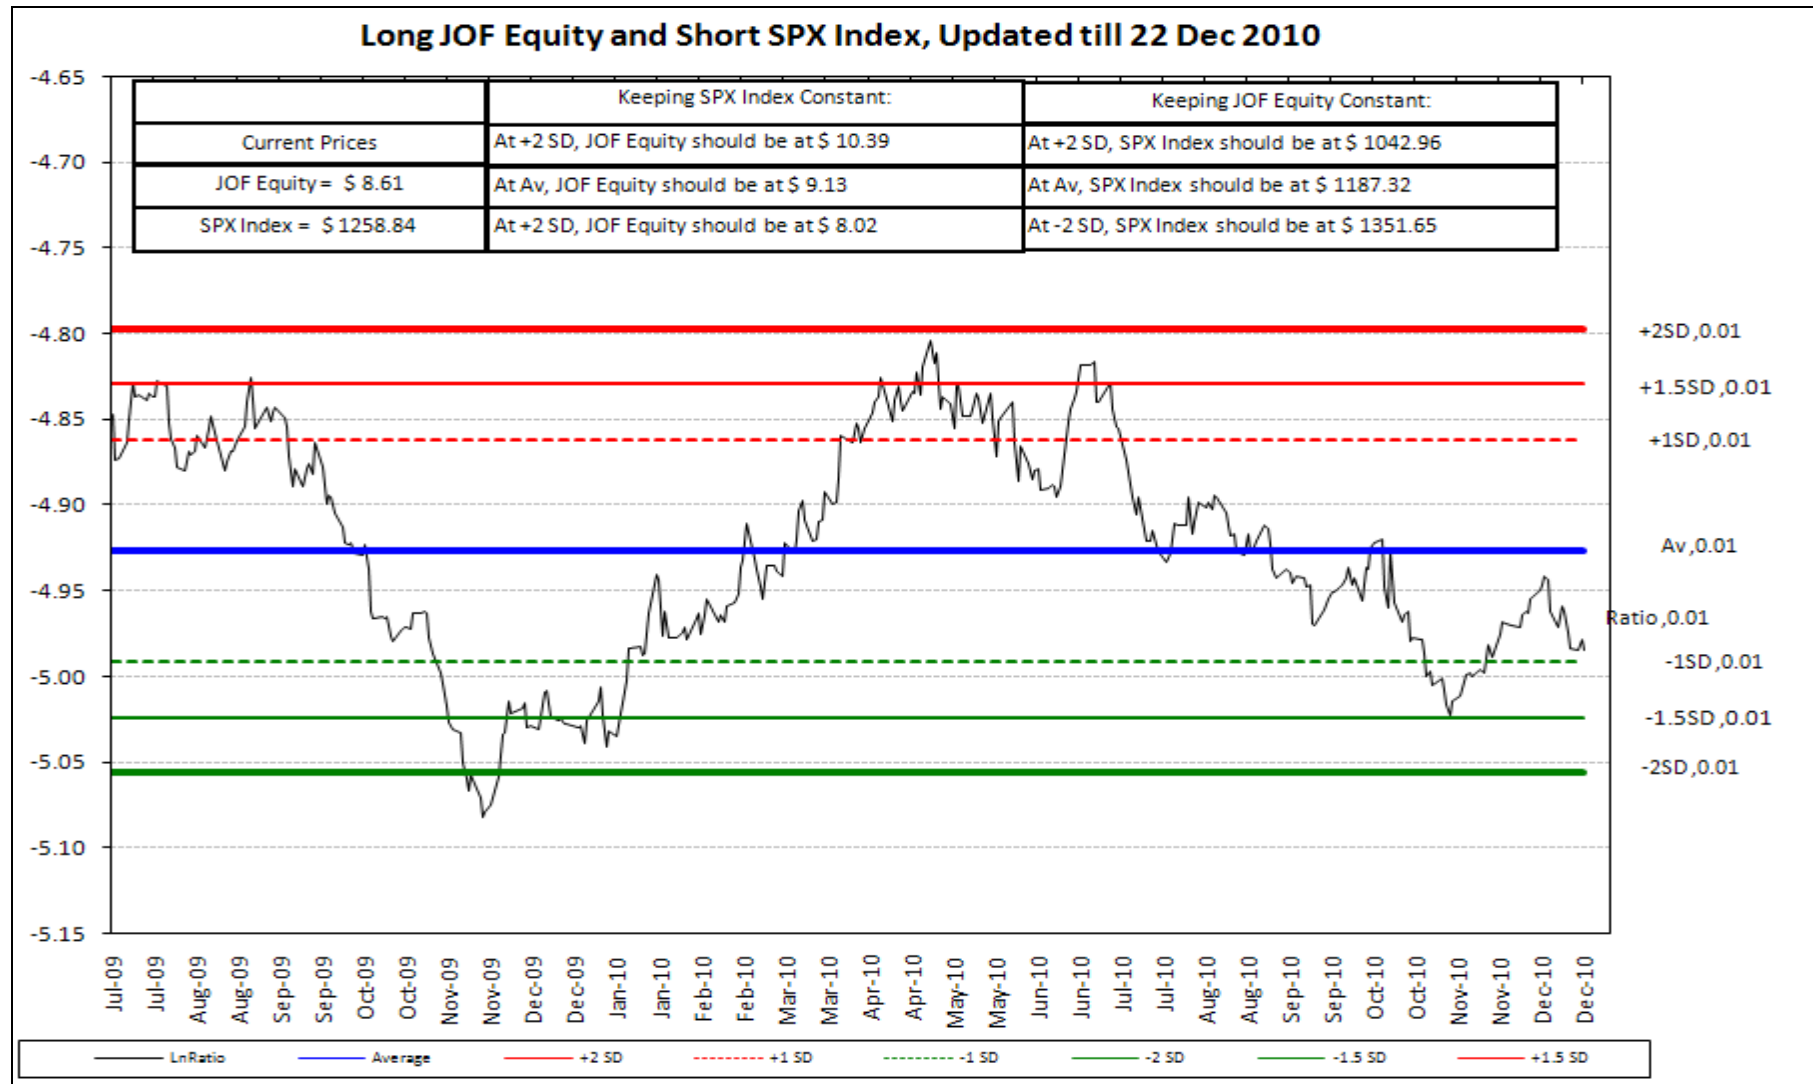

On premature basis , this area could very well be the top the CZ test of 26 – 26.5 and test with 3.5 M daily & close under 25.50 Daily should be a good test to initiate the position.

JOF – Technical & Pattern Analysis –

Pull back into CZ 8.40 – 8.55 with 60K shares and close above 8.55 would be good signal to Buy . Stop as always on other side of CZ as SPX is on POM 14 .

XLV – Correlation Ratio Analysis with SPX – 365 days Time basis

Long XLV Equity and Short SPX Index, Updated till 30 Dec 2010

XLV – Technical & Pattern Analysis & Price / Volume

The XLV / SPX ratio chart looks bullish and should trend up in RH side chart below, confirms the relative rise in **XLV / SPX (hence undervalued)** by this matrix **in Sync with SD Analysis**.

XLV – Technical & Pattern Analysis & Price / Volume

The larger H & S Bottom should hold on pull back along with Trend line , RSI should pull back to 50

XLV – Technical & Pattern Analysis & Price / Volume

The CZ on bullish side 30.5 to 31 , the smaller head and shoulder within larger head and shoulder could stop the pull back, Volume on test should be 3.0 M to reject the test. Stops always on other side of CZ,

TLT – Correlation Ratio Analysis with SPX – 365 days Time basis

We ware watching this carefully for SD# - 2 , for undervaluation Zone

2 – TLT- PEC Analysis

PEC D – Target on TLT has reached 91 (completing a 0.786 retracement) . Overall, bonds appear to be oversold and are due for a rally. if SD # 2 & POM 's lines up , We may re visit this market on buy side with TLT.

Our first PEC D point came in at 107 with Extreme “ Bullish Sentiment “ and that marked the Top with Triangular formation,

2 – TLT- POM – ST - Price , Volume & Pattern Analysis (MONITORING CZ –PQV)

TLT – Our price target of 89 - 90 should be CZ by POM / PQV . If SD # 2 / PQV qualifies , might give a next good signal on POM. PEC D at 91 has been reached. Our price target of 89 - 90 should be CZ and test to be with 40 M shares weekly, but volume is expanding 96 m) this suggest after the bounce the lows of 90.50 will be tested and market may go into consolidation)

MUB – 3 Yrs - Technical & Pattern Analysis – (MONITORING CZ –PQV)

It came into the CZ right on the nose 97- 98 but the volume is heavy, we should get the test of the lows again which might be the secondary test . (Possibility we may not get to tick lows) however we had a climax volume at the first lows

MUB – Technical & Pattern Analysis –

On Daily , Rejected the lows in CZ on the nose SD is at - 2.0 undervalued. This is classic example of CZ test and Healthy rally began with SIGN of STRENGTH , this is Bullish. Possibility we get to 98.5 – 98.75 on pull back and if it comes in 300k shares , this should be rejection and give a bullish signal . RSI has diverged bullishly on the 2nd re test , this is bullish as well we will move this in our PQV report with CZ in the PQV Validated watch list , this is slow moving but may get some Yield with it (Stop outside CZ)

SLV – Correlation Ratio Analysis with SPX – 365 days Time basis
