**Immediate Release- SPX – BONDS – Institutional Report**

By: Suneil R. Pavse, CMT

### Executive Summary.

	Current Price	POM Triggered within CZ & Date	Announcement- ST Trend reversal & Risk Management .	Progress Status	Existing Position / Exposure	NEW ACTION (Trigger to Watch)	Upside CZ Near Term	Upside CZ Mid term	Downside CZ Near term	Downside CZ Mid term	Remark
SPX- 500	2297	POM 14 Triggered @2258 On January 1 <sup>st</sup> 2017	None	NEUTRAL	0%	None	Double top to retest 2300-2310	Target to PEC-D 2310  Head and Shoulder Bottom target	Pull back to 2240-2230 & bounce	ABC down to 2200-2180  <b>Best Risk/ Reward for new longs</b>	

- We stay on sidelines for now with Cash position. This is strictly “Cash Management” move.
- The best Risk Reward for new Net long equity purchases would come around CZ 2200-2180.
- Market has NOT proved itself for Net Short Signal yet. For Net Short Signal, market needs to be outright Bearish by secondary / tertiary failure on price / volume test.

	Current Price	POM Triggered within CZ & Date	Follow up Announcement- Update For ST Trend Reversal & RM	Progress Status	Existing Position / Exposure	NEW ACTION (Trigger to Watch)	Upside CZ Near Term	Upside CZ Mid term	Downside CZ Near term	Downside CZ Mid term	Remark
TLT (BONDS)	119	POM 13 Triggered 11/20 CZ 121-118	Fully scaled in @ 119.2 Average price M2M @ 119 Jan 1 <sup>st</sup>	BULLISH	Net Long 30%	NONE	Rally to Retest 123.5 With Bullish Top  Hit once @ 123.5	Target to PEC-D / Gap area 127	Pull back to 120- Rejected Lows	ABC down to 118 Net exact Bullish Bottom	Stop loss at 117

- We scaled into TLT Net long POM 13 position ; avg price 119.2.
- On 1<sup>st</sup> Jan Marked to Market at 119 as cost basis
- Currently TLT is at 120. ....( almost at breakeven)

Keep stop losses based on risk appetite, volatility and asset allocations.

TLT:\_ Triggered POM 13 - Net long at 119 on TLT.

TLT met the pull back to 120 levels and rejected lows. It is building a handle base on Bullish cup formation for fresh move higher towards the upside target of 123.5. Our final target is PEC-D 127.

## Market Overview SPX- BONDS

**SPX:** Past week, volatility came in the market as expected: **SPX** down 25 points and up 25 points in one week. This is continuation of pattern previously highlighted; “Three drives to Top” at 61.8% completed at 2300 followed by failure of test on volume on Friday (1/27) at 2300. This resulted in shallow pull back to 2270 by Monday / Tuesday followed by secondary rally **back up to double top as expected to 2300** by Friday (02/03).

We have been warning for some time against Net Short position which has been whip sawed / squeezed lately. Since our exit of Net long SPX position @ 2260 , Market has moved up only 28 points. For us, this is “No Fly Zone” purely on risk prospective.

**On very short term** there is some residual positive energy in the market as suggested by put / call ratio is still above 0.75 and NO expansion in downside volume. Additionally, there is mini Head and shoulder bottom that has target of 2310.

**On Midterm basis-** The volume contracted on upside during the price rise for past 2 weeks and Open Interest keeps dropping which is a weak Market. The presidential cycle suggests historically post-election February a down month.

Although the patterns and projections are being completed, there is no outright Net Short signal yet till secondary or tertiary failure on price / volume test is accomplished along with failure in Market internals such as TICK/ TRIN, MC – Oscillator to present the best Risk / Reward.

There is sizable cash on sidelines to add to the 1<sup>st</sup> pull back. For new equity purchases (Net long), the best risk / reward would come around **CZ 2200-2180** and always we wait patiently.

Meanwhile there is lot of money to be made elsewhere in Mining, Commodity Sector, Precious metals etc v/s being obsessed in SPX and getting head sliced on short side.

**SPX Triggered POM 14- Neutral Signal. We are holding 30% Cash in the Portfolio from the proceeds sale & 10% Profit** [Trump Election Rally Trade] . We exited on January 01, at SPX- 2260

# NYA / Volume Analysis – C Z- PEC- D Daily- Mid term

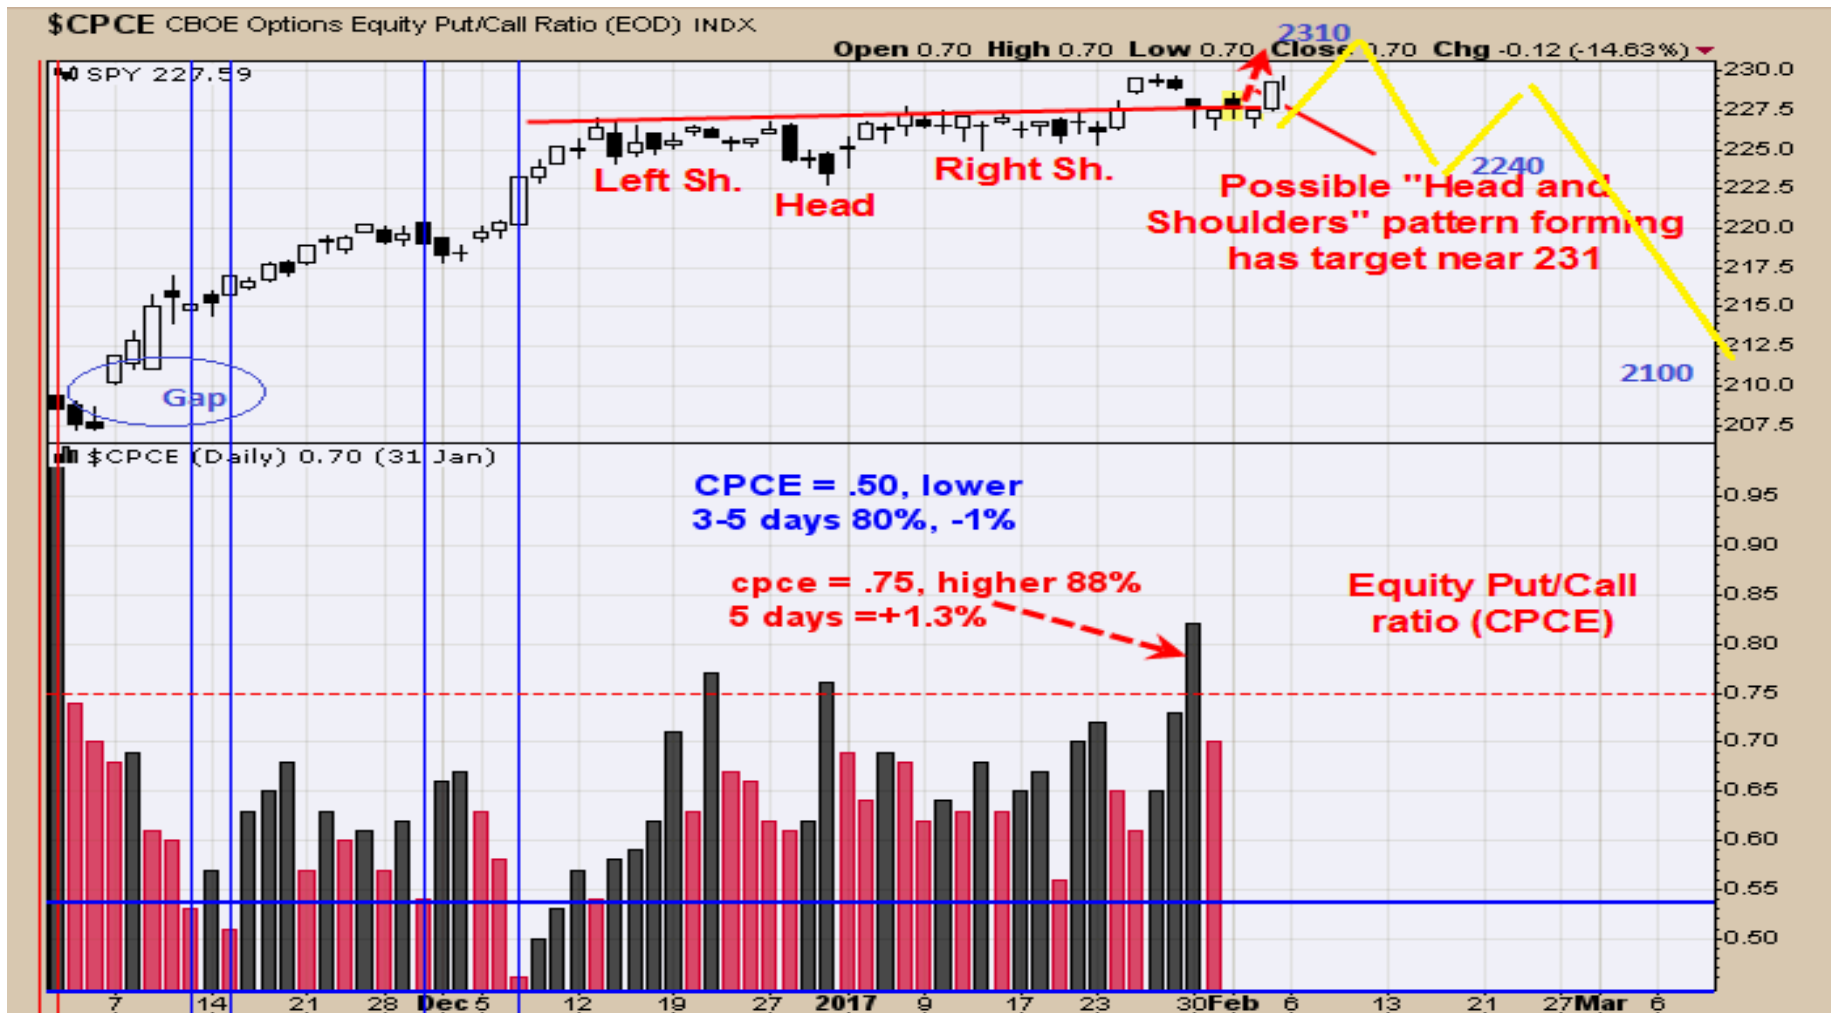

The NYA is running into the 2015 top. The pattern forming is “Three Drives to Top” pattern which has a downside target near 11K (not a big pull back target). A bounce is in progress to double top.

# SPY / Volume Analysis – C Z- PEC- D Daily – Short Term

CBOE equity put/call ratio readings above .75 suggests short term higher prices. The Short term pattern that may be forming is a “Head and Shoulders bottom”. This pattern has an upside target near 2310.

The best Risk Reward for new equity purchases (Net long) would come around CZ 2200-2170.

# TLT / Volume Analysis – C Z- PEC- D Daily

TLT met the pull back to 120 levels and rejected. This is secondary lows. It is building a handle base on Bullish cup formation. Now it should rally back towards upside target of 123.5 with Bullish top. Our final target is PEC-D 127.

## SPX – Cyclical Model

- SPX - Seasonality

Negative- Post Presidential Cycle .

- SPX - Geomagnetic / Lunar Cyclic Model

Negative

- SPX - Sentiments Model

AAII Weekly Sentiment Survey – Bullish

## SPX – Internals Model

- Midterm - TICK / TRIN - Neutral
- AD Oscillator, Ratio's – Neutral

# Appendix Content

- Objectives & POM /CZ / PEC –D Guidelines – Refer to detail Annexure
- POM – “ Price Oscillation Model “ Criteria
- PEC –D “ Pythagoras – Expansion & Contraction Criteria
- CZ- Confluence Zone Criteria
- TEXTURES – Bullish , Bearish , Neutral

## Critical backdrop Notes –

- *Price path Analysis is running commentary of the Market’s price behavior , Not a Trade Signal.*
- *Intermittent CZ’s are Short time out / Risk management for overweight position / rebalancing spots. Unless your own Portfolio objective demands.*
- *POM’s are Action points. Also at times Action points is at Main CZ’s when specifically announced Triggers.*
- *Model does not encourage Buying in between unless its false break upside or false break downside soon after POM / Main CZ Trigger and is specifically announced . Model stays with Trend POM to POM Signal.*

## POM criteria for Implementation on SPX

- POM is rated from 10 to 15
- POM 14 , 15 ( is Sell Signal) and 12 , 11 ( is Buy Signal ) both are the Actionable Area whereas POM 13 is A Neutral Signal for Risk management
- On way UP move, POM 13 signifies to STOP executing additional “New Buys” that was initiated at POM 12 or POM 11 levels
- On way DOWN move, POM 13 signifies to STOP executing additional “ New Short Sells” that was initiated at POM 14 or POM 15 levels
- (Bear Markets) POM 15 is for - Net Short & POM 14 is for - Hedge Longs
- (Bull Markets) POM 15 is for -Hedge Longs & POM 14 is for - Partial Hedge
- POM 12 & 11 is for Net Long
- POM 10 is Climatic Crash low Buy Signal to add to Net long position (Rear event)

# Pythagoras Expansion / Contraction – (PEC) Model

- PEC Model is a 2<sup>th</sup> Derivative Timing Tool utilized on core currencies which identifies the turning point, for Tops and Bottoms on “Short & Intermediate term” Trend in the currency market.
- Methodology is based on Mathematical Pattern Recognition with Symmetrical Pythagoras Triangular expansion and contraction ( PEC) in concert with Price Oscillation ( POM) . This has a high probability for greater accuracy on Price projections at confluence when Integrated together.
- Once our POM analysis is complete, it will overlay PEC. The input signals are from tracking rolling Arithmetic Numerical series of Regression utilizing Fibonacci to Identify Triangular patterns of Expansion / Contraction. Triangular pattern completes at the convergence of 2 separate Fibonacci extension levels and overlay Price Oscillation Model.
- Since the Currency has 2 dimensional pairs, PEC is critical to analyze with 2x2 Fibonacci steams to achieve confluence point D coinciding with POM

## PYTHAGORAS EXPANSION / CONTRACTION –(PEC) Model

The output signal of ABCD price moves preceded by a swing high or low (XA) generates projection point D, which is actionable point derived from 2 connecting triangles with convergence ratio. As with all geometric patterns, a Buy or Sell signal occurs as the pattern completes at point D

### Buy Pattern (bullish)

### Sell Pattern (bearish)
